v. 8 (no. 2) p. 299-304.

DESCRIPTORS: Geophysics, *Seismographs,
Seismic waves, *Reflection, Statistical analysis,
Probability.

The purpose of this study is to construct a synthetic
seismogram, considering only simple reflections and
triple reflections, where the second reflection may take
place at the surface or in depth, and furthermore,
limiting oneself to those which bring a substantial con-
tribution. The problem consists in determining the
limit value H of the coefficients of reflection below
which their contribution, in the form of triple reflec-
