MEMORANDUM FOR THE RECORD

SUBJECT: Tentative Plans for the Location of Remote Devices in the Support Directorate for the MIS System

In response to a request from the Office of Communications to provide tentative information regarding the installation of remote devices in the Support Directorate for the Management Information System, the attached list has been compiled for the purpose of giving some indication of the number of locations that may require remote service. The list has been prepared in two ways: (1) by component and (2) by location. However, the system has not been designed. This list is highly speculative and tends to anticipate requirements which may never materialize, or may be impossible to justify. Some of the [redacted] locations of Personnel and Security may be considered for consolidated use of input/output processing centers, [redacted]
