

SECRET

2 May 1966

25X1 Mr. []

25X1 I received a call from Mr. [] one of Mr. [] Training Officers, 25X1
25X1 about [] has been with the DD/S&T for a bit over a
year now.

25X1 [] is raising no issue on this and hasn't talked to [] about it. 25X1
But sooner or later we are going to be faced with the problem of slotting CT's
here at Headquarters. [] 25X1

25X1 [] in Finance all here at Headquarters who
have been out of formal training for better than a year now.

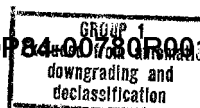

You will recall that I suggested some time back that we require Headquarters' components when they identify requirements to identify slots along with them. Alternatively, we could, for the short run, use the Support Officers Development Program slots that are still vacant to accommodate these people; although that method of solving the problem would not be available to us for long.

Again, we could still retain centralized control and perhaps better control than we do now (since these people still carry **ST** labels) were we to attempt to get them slotted where they are working and give them the SD label.

25X1 I promised [] a tentative answer on [] We can either slot him on 25X1
our T/O or allow DD/S&T to slot him on theirs. Do you have any preference?
