POLITICAL-ADMINISTRATIVE MAP OF CUBA

The Map Library of the Central Intelligence Agency has recently acquired an official political-administrative map of Cuba at the scale of 1:750,000. The map covers the entire island of Cuba, the Isle of Pines, and the offshore cays in two sheets. Compiled by the Cuban Institute of Geodesy and Cartography in 1972, it was printed in 1974. In addition to political-administrative information, the map shows cities in five population categories, six categories of roads, and railroads, airports, and dams. It locates sugar refineries by name and includes 1970 census data down to the *region* level. It is the most recent official map of Cuba presently available.

Loan copies of this map may be obtained from the main Reference Branch of the CIA Map Library, Building 159E (code 143, extension 2688) or from the Map Library Reference Facility in Room GE-0444 of the CIA Headquarters Building (extension 6563). When ordering, please make reference to Map Accession Number 240095. The map is UNCLASSIFIED.
