

20 APR 1979

MEMORANDUM FOR: Chief, Administrative Staff/NFAC

SUBJECT: Parking

Concerning the OMB circular on Employee Parking, OSI takes the position that Agency personnel should be exempted from paying for parking at the Headquarters building. Many employees do not have public transportation available to them between their home and Headquarters building. Also, those employees who are required to drive to work because of the lack of public transportation do not have the option of any off-street parking near the building. Finally, a number of employees including analysts, managers and secretaries at widely different grade levels find it necessary to work beyond the normal work hours to meet the demands of their positions. These people are unable to participate in carpools and, with the inadequacy of public transportation, would be unfairly discriminated against if required to pay for parking. (All unclassified)
