PUREWATER SYSTEMS  
FOR WATER THAT'S PURE & NATURAL  
P.O. BOX 756 • LEBANON, VA 24266 (703) 889-5984

CLASSIFIED

DIRECTOR CIA  
(CENTRAL INTELLIGENCE AGENCY)  
WASHINGTON, D.C. 20505

Gentlemen,

I have marked this material classified as everyone should not know the capabilities in dealing with this area of concern. In the event of a nuclear, chemical or bacterial war, water supplies will be rendered non-potable. Stored supplies can only last so long, then water will be a very critical commodity. Over the last year we have supplied the U.S. State Department with several of our units for use in the Embassies overseas. We presently have units in Khartoum, with an order on the way to Lome, Togo and units with USAID in Sudan. However, every critical operation should have one or more of these units as a back up emergency source of water. Distillation is the single most effective method of removing chemicals, bacteria or radio-active particles from water. Our units are easily stored until needed, are easily transported if needed and are constructed of high quality stainless steel. We are a small business concern and I am a Viet-Nam era Veteran. We desire to be of service and would appreciate the opportunity to be of assistance. Please make this information available to those with the authority to decide upon this matter. If we may be of service please send us your purchase order soon.
