

DOMESTIC NETWORKS DIVISION
SPACE NEEDSI. Overview:

The Domestic Networks Division requires a significant amount of additional space during the next five years as recapitalization occurs and replacement systems are developed, installed and tested. This period of high space needs will culminate with the installation of the new systems in the new Headquarters Building and scrapping of existing systems. Sufficient space in the existing Headquarters Building will not be available for this process. Only 4,000 square feet of space has been identified for OC use after [redacted] is occupied.

STAT
STATII. Specific Space Needs:

1. MERCURY: 3,000 square feet is required for equipment installation. Space for contractors and training is also required for a total requirement of 6,000 square feet.
2. Message Handling Facility (MHF) will require 2,500 square feet for equipment and 2,500 for contractors and training for a total of 5,000 square feet.
3. LAN development for new building.
4. NPIC development program technical support.
5. Logistic space for staging of domestic recapitalization equipment. Space to store wire and other materials to avoid clutter in the Headquarters' hallways. Approximately 15,000 square feet is required.
6. Space for staging contractors [redacted] is required.
7. Approximately 2,000 square feet of space in the Headquarters Building is required for the installation of a replacement black telephone switch.
8. OC requires room to establish a Watch Office and requirements staff.
9. Additional office space on the order of 10,000 feet is required for the establishment of a domestic field group and a metropolitan group.
10. Additional technical shop space is required as domestic requirements increase.

STAT
