- A Compendium of Evidence

Dick Stone read your Compendium of Evidence yesterday and thought it was quite good. He felt that it would be more effective if it started off with Section V, i.e. what's happening currently. Otherwise, he says only scholars will get far enough to get what's going on now. The suggestion would be to get the current picture and have the background file.

The markings in the text are for the purposes of lifting those portions into my worldwide testimony.
