INTERAGENCY INTELLIGENCE ASSESSMENT 26 October 1983

GRENADA: THE CUBAN FACTOR

Prior to yesterday's invasion, the Cuban contingent in Grenada was believed to comprise at least 400 personnel consisting of the following elements:

- a construction brigade housed at the Point Salines Airfield
 (350 personnel)
- -- a military advisory mission headquartered about a mile north of Point Salines (10 to 12 advisors)
- -- the Cuban Embassy staff and guard force located in southeastern St. Georges (at least 15)
- -- civilian technicians and advisors (including 25 medical personnel and 15 technicians at Radio Free Grenada)

This does not include any forces that may have been aboard a Cuban Naval Academy training ship, the Vietnam Heroico, which has been used to transport cargo and as a troop carrier that was anchored at Port St. Georges.

25X1

that 350 Cuban workers at the airfield were safe and in their barracks. These men include many military reservists, some of whom may have had combat experience in Angola or Ethiopia.

Indicated they were armed and may have been formed into squads or companies. Cuban Colonel Pedro Tortola Comes, who arrived on the island only Monday, was said by Radio Havana yesterday to be in charge of the workers holding out at the airport.

25X1

This Interagency Intelligence Assessment was requested by the National Security Council Staff. It was prepared under the auspices of the National Intelligence Officer for Latin America by 025X1e Office of African and Latin American Analysis, CIA. The Assessment was coordinated at the working level with the Central Intelligence Agency, the Defense Intelligence Agency, the National Security Agency, and the Department of State. Information available as of 0900 hours on 26 October 1983 was used in the preparation of this Assessment.

INTELLIGENCE COMMUNITY STATEMENT 26 October 1983

ATTACHMENT TO GRENADA: THE CUBAN FACTOR

At approximately 0130 hours on 26 October, Cuban President Castro made a public statement and answered questions from the press in Havana. When asked how many Cubans are in Grenada, Castro responded that there were more than 700, including some 550 construction workers. At 0945 on 26 October, we	
received a report	25X
stating that the Cuban Foreign Ministry was informing its Missions overseas that there are approximately 1,000 Cubans in Grenada. The	25X
	25X
	_25X
	25 X
Previous reporting has indicated a basic complement of 350 to 400	

Previous reporting has indicated a basic complement of 350 to 400 construction workers, although approximately 200 additional workers were introduced late last year -- presumably to replace construction workers already there -- but we were never able to confirm their return to Cuba. If they did not return to Cuba, this would account for much of the discrepancy with our previous estimate of 350 construction workers. Vietnam Heroico could have brought in some 200 - 300 more personnel, accounting for the remainder of the discrepancy.

In view of the conflicting reports and the lack of good independent information, we estimate that as many as 1,000 Cuban personnel could be in Grenada, although an estimate of 400 to 700 still appears to be a more credible range.
