4. Scheduling of NIE 11-4-57
Soviet Capabilities and Courses
of Action Through 1962
(IAC-M-282, item 6)

The Chairman and members reviewed in considerable detail various factors relevant to the scheduling of this paper, including the practical difficulties inherent in attempting to satisfy the needs of various potential consumers whose primary requirements arise at different times during the year, the effect of timing on the quality of intelligence available and certain other production problems. In the course of the discussion, the Chairman emphasized the desirability of timing publication so that those important Congressional or Executive decisions to which this paper might be pertinent could be made in the light of the latest available agreed intelligence. The members also discussed the question of meeting the needs of specific consumers through interim reviews of significant changes rather than complete revisions of the basic estimate. Following this exchange of views, the members concurred in the Chairman's suggestion that NIE 11-4-57 be scheduled for completion about 15 November. In this connection, Mr. Kent noted that, on the basis of informal advice he had received, publication of NIE 11-4-57 in November might satisfy the NESC's requirements and eliminate the need for production of a "Gross Capabilities" paper.
