KGB Border Guards maintain careful control over the populated parts of the border region and closely monitor civilians in the area, The KGB's activities are in accord with a 25X1 Soviet law that establishes a "forbidden zone" 30 kilometers deep along all USSR borders. Imagery indicates that there are about 100 outposts along the approximately 2,500-kilometer border and an estimated 8,000 to 12,000 guards, who could be augmented as necessary by approximately 8,000 regular army troops in the area. Civilian residents of the zone are registered; travelers are checked for appropriate entry stamps and for legitimate reasons for entry; residents are warned to report unusual activity or the appearance of strangers. Physical security along the Soviet side of the border--defined by a river in its more populous parts and running through high mountains and deserts in other stretches -- varies according to the terrain. Imagery indicates that heavy security -- a combination of nearly impenetrable manmade barriers, alarm devices, and armed guards -- protects about 60 percent of the border, the portion that could easily be traversed. Watchtowers in heavy security areas are usually at one-to-two-kilometer intervals. Medium security--with fewer outposts and manmade barriers--exists along about 35 percent of the border, where rugged terrain, sparse population, and the lack of major transportation networks make crossings more difficult. In medium-security areas, watchtowers are usually at 15-to-40-kilometer intervals. The remaining five percent of the border area has only light security. This area, mostly along the Pyandzh River (the upper Amu Darya), is devoid of transportation routes, settlements, or border outposts, and it features extremely rugged terrain, particularly on the Soviet side. This area contains no border guard outposts but is probably patrolled periodically by air and monitored by means of remote surveillance or listening posts. 25X1 25X1 Insurgent Raids and Forays 25X1 The evidence on raids into the USSR ₂5X1

"undeniably" that such raids have occurred, though they may have been little more than cattle-rustling expeditions. Moreover, Soviet media

arphi have periodically hinted that there is illegal cross-border traffic.

TOP SECRET	
	25X1
Soviets have increased the number of border posts and repositioned	25X1
watchtowers because of the number of raids	25 X 1
Soviet countermeasures on Afghan soil are hindered by the extensive control exerted by the insurgents.	.25X1
Soviet and Afghan forces control	•
only the major transportation routes through Afghanistan's border districts. Another Soviet countermeasure, the use of informants of	25X1
Tajik origin, has prompted insurgents to restrict their relations to	V
trusted family members living in the USSR	25 X 1
	25X1
Conclusion	25/1
From the Soviet standpoint, the raids may intensify a long-standing, general concern about the security of the USSR borders. That concern may harden Moscow's resolve to consolidate its control over Afghanistan.	25 X 1
The primary benefit of the insurgent crossings, however exaggerated the reports may be, is probably the bolstering of morale, along with increasing costs for the Soviets and the tying down of some forces. More frequent raids would probably tie up additional Soviet forces and raise Soviet costs further. But the obstaclesboth military and logisticto expanding the scope and effectiveness of insurgent raids will probably remain so considerable as to preclude any notable	
political or military insurgent successes.	25X1
