5 April 1985
MPA-5016

MEMORANDUM FOR: Director, Foreign Broadcast Information Service
THROUGH : Chief, Operations Group
SUBJECT : Monthly Report — Panama Bureau — March 1985

I. GENERAL

From the focus of expanding coverage in the bureau's primary area of responsibility, ROSET activities during the month proved very valuable. Satellite-carried television programming from Mexico, Venezuela, and Colombia was cruised out and sampled. Of the three Mexican television stations observable, two merit coverage and offer valuable, never-before-available coverage of an important target. Venezuela and Colombia both transmit one television station via satellite and our initial observations indicate that the more productive television coverage may soon supplant some of our present shortwave sources for those countries.

The signals analysis section also identified and sampled Spanish transmissions of Moscow TASS and NOVOSTI, Hamburg DPA and Beijing XINHUA. Three Peruvian television stations were identified and await sampling and Moscow television's important foreign affairs program "Studio 9" was observed on the 14 West Gorizont at the same time the program is seen in Moscow. After some initial shifting of location, Brasilsat appears fixed in orbit at 65 West and some initial signals testing was observed. Brasilsat is reported to become fully operational by late May or early June.

A two-day visit to the bureau by ADDS&T James Hirsch and DD/FBIS was filled with briefings on bureau operations, ROSET equipment and activities; meetings with Everett E. Briggs, U.S. Ambassador to Panama, and other senior embassy officers; and discussions on current headquarters activities with the bureau's U.S. staff.

During the month the bureau provided D/FBIS with professional quality color photographs and 35 mm slides of the ROSET-related equipment. The photos were for a proposed article in a special publication.

II. OPERATIONS

A. Monitorial/Editorial

As the month opened, Nicaragua's President Daniel Ortega met U.S. Secretary of State George Shultz in Montevideo, Uruguay, during visits by the two men for the inauguration of President Julio Sanguinetti. After his return to Managua, on 4 March Ortega announced a new peace initiative with three main points; a moratorium on the acquisition of new weapons; the sending home of Cuban military advisers; and a solution to the Contadora impasse, suggesting that Nicaragua would release the young draft dodger who was arrested after seeking political asylum in the Costa Rican Embassy. The young man, Urbina Lara, was in fact released and allowed to travel to Colombia soon after Ortega's announcement. The United States, however, was quick to reject the Ortega initiative saying that it had little substance.

For a few days bureau interest focused on Nicaraguan and Cuban reaction to the death of Soviet leader Konstantin Chernenko and the election of Mikhail Gorbachev as CPSU general secretary. Nicaragua's Daniel Ortega and Cuba's Vice President Raul Castro traveled to Moscow for Chernenko's funeral where they met individually with new Soviet leader Gorbachev.

On 12 March, Venezuelan President Luisini's annual address to the Venezuelan National Congress was monitored and processed from Venezuelan television — the first scheduled major event to be covered by the bureau from regular satellite television transmission. Processing of the Luisini speech was expedited by a very good reception of Caracas television as opposed to our regular shortwave sources which are often poorly heard.

On 25 March the bureau began regular experimental coverage of identified ROSET sources of interest. With a schedule of Mexican, Venezuelan, and Colombian television newscasts and the appropriate satellite information, the bureau — using its one ROSET antenna dedicated for operational coverage — began alternately covering those television sources and the numerous and highly productive press agencies carried on the 34 West Intelsat. These include three Havana PRELA circuits, Managua ANN, Moscow TASS and NOVOSTI, San Salvador SALPRESS and NOTISAL, and the clandestine Radio Venceremos Press Service. Coverage of the satellite television transmissions was immediately productive as the bureau covered an important visit to Mexico by Argentina's President Raul Alfonsin from Mexican television.

-3-

A government crisis in Honduras that came to a head on 28 March resulted in three days of 24-hour operation and an extremely heavy processing load. Over the objections of President Roberto Suazo Cordova, the Honduran legislature voted to remove five Supreme Court justices for alleged corruption. The president called the legislators' action a virtual coup and put the armed forces on alert. After the legislature swore in the new justices, government prosecutors filed treason charges against the five men and arrested Ramon Valladares Soto, who was named by the legislature to head the newly reconstructed court.

B. Communications

For the second time in the past two months, our local AUTODIN relay, PAR, delayed many of the bureau's time-sensitive high precedence items from four to nine hours without notifying bureau communicators which would have alerted us to use our alternate communication route. Despite verbal assurances by the PAR NCOIC that the incident would not be repeated, similar delays were documented during the Honduran government crisis. The bureau has advised the commanding officer of the USAISC Panama of PAR's poor performance that seriously jeopardizes the bureau's mission.

C. Technical

The bureau received and installed three Sony CFC-100 color subcarrier frequency converters. These color converters allow us to videorecord color signals of satellite television transmitted in NTSC format on the standard ROSET Sony VO-5630 videotape recorders. In addition, PAL-N and PAL-M television systems can also be recorded in color with these converters. Since all of our Latin American satellite television transmissions are in either NTSC, PAL-N or PAL-M systems, without these color converters all of our videorecording would have been in black and white.

III. ADMINISTRATION

A. Personnel

STAT We have made the final selection of candidates to fill vacant
 STAT foreign national positions. Former monitor supervisor [redacted]
 STAT officially rejoined the bureau on 31 March as a monitor. Pre-employment
 STAT processing has begun or soon will begin for four other Spanish monitors,

[redacted] cruising monitor [redacted] associate editor
 [redacted] communications operator [redacted] and radio
 STAT technician (boardman) [redacted] With the filling of these
 STAT positions we will be at the authorized non-staff T/O of 47 for FY 1985.

STAT The following employees received PSIs during March: Monitor
 STAT Supervisor [redacted] from FBN-11/6 to FBN-11/7 and Senior Monitor
 STAT [redacted] from FBN-10/3 to FBN-10/4 effective 3 March 1985; Radio
 STAT Technician [redacted] from 3/1 to FBN-3/2 effective 17 March 1985.

STAT Editor [redacted] departed Panama 29 March upon
 STAT completion of a three-month editorial training.

STAT Editor [redacted] arrived Panama 11 March to begin her
 STAT three-month editorial training.

B. Building and Grounds

We received on 14 March a 50-ton Carrier Package Chiller,
 Serial No. YKPM-228270, Model LCHA-55-25D, to be placed on the already
 completed concrete base. The initial inspection of the chiller DEH
 delivered to us revealed the following damage:

- The two front doors are bent out of shape.
- The back channel and cover are bent out of shape.
- The insulation of the chiller is damaged.
- The tube for the liquid and the expansion valve are twisted out of shape.

STAT Since the unit was received with the above damage, we consider
 STAT that all needed repair and flaws in performance caused by it should be
 repaired free of charge under the warranty. We have discussed these
 matters with [redacted] Chief of the DEH Estimates Branch, and with
 [redacted] Deputy Chief of DEH's air conditioner maintenance
 section.

New security clocks have been installed on the three entrances
 to the bureau, the front and back doors and the door to the bureau chief's
 office. The security guards will be checking these clocks every two hours
 between 6 p.m. and 6 a.m.

IV. VISITS

A. To the Bureau:

STAT

James Hirsch, ADDS&T, and [redacted] DD/FBIS, visited on 19 and 20 March for briefings and inspection of bureau's ROSET-related operations.

STAT

[redacted] deputy chief of FBIS P&TB, and [redacted] personnel officer in FBIS Administrative Staff, visited on TDY from 13 to 16 March.

STAT

STAT

[redacted] Embassy in San Salvador, visited the bureau briefly during the month while he was in Panama on other business. In the past, [redacted] has been helpful to us in tracking down problems related to our remote operation in San Salvador.

B. From the Bureau:

ROSET engineer Ed Baker attended a half day conference at Fort Amador sponsored by the local chapter of the Armed Forces Communications and Electronics Association on 6 March. A guest speaker from the Harris Corporation demonstrated new technology in tactical HF communications equipment, primarily designed for military applications.

STAT

STAT

The bureau chief and [redacted] the bureau's chief technician, traveled to Guatemala City, Tegucigalpa, and Managua for a semi-annual inspection tour of the bureau's remote operation. Bureau chief monitor [redacted] participated in the Honduras and Nicaragua legs of the inspection tour for his first on-site view of the remote operation. The planned visit to San Salvador was omitted at the request of the local embassy which cited a period of increased tension prior to the 31 March elections.

STAT

Deputy chief [redacted] met with Lieutenant Colonel Ellis G. Reeder, executive officer of the U.S. Army's Task Force Bayonet on Fort Clayton on 18 March. Col. Reeder was provided an estimate by the bureau antenna contractor to replace the HF antenna tower destroyed on 28 February by an Armored Personnel Carrier belonging to Task Force Bayonet.
