

27 January 1971

MEMORANDUM FOR THE RECORD

SUBJECT: KY-3 Secure Voice Terminals

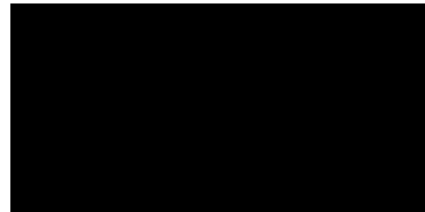

1. Attached is a listing of KY-3 terminals presently in Agency occupied buildings located in the Virginia area nearest to Headquarters. These units are all connected to the Headquarter's green-grey switch.

2. This data has been compiled to provide a basis for determining, as needed, what costs might be incurred by moving any given listed component's KY-3(s) from one building to another, or, what savings could be realized if said terminals were reterminated on the Headquarters site. Off-setting circuit costs of any moves to Headquarters will be \$30 per month per terminal plus some savings in installation costs.

3. Terminal liability on all KY-3 lines in Virginia is set at \$1,110 over a 5 year period, or \$18.50 per month. For example, an additional charge of \$610.50 would be assessed if the CCS/DDP KY-3 in [REDACTED] were terminated 1 Feb 1971 (33 mo x 18.50).

25X1A6a

4. No attempt is made to determine costs or savings relative to a possible relocation of NPIC KY-3 terminals as this system is too complex and extensive.
