MEMORANDUM FOR THE RECORD

SUBJECT: Secure Storage Wall

25X1A9a

25X1A5a1

25X1A5a1

1. [REDACTED] Records Management Officer, and the undersigned met with three representatives of [REDACTED] concerning the design of the side file safe component of the secure storage wall. The [REDACTED] Engineering Manager produced their design drawings showing an overall dimension of 20" deep, 30" long and 60" high (including a toe opening of 1 1/2" for using fork lifts for ease in moving).

25X1A9a

2. The side file security container will provide a 25 % increase in filing capacity with a 20 % reduction in necessary floor space over the standard 4 drawer safe currently in use. The storage unit which can be used with it can provide additional space features such as elimination of book cases and supply cabinets. This feature was particularly appealing to [REDACTED]

25X1A9a

3. [REDACTED] was of the opinion that the side file security container would prove its adaptability and versatility when used in office landscaping with or without its storage cabinet feature. Another assist in office landscaping will be its planned availability in six colors.

25X1A5a1

4. The representative of the [REDACTED] division concerned with the other component parts of the secure storage wall advised that the filler unit is designed to provide for either shelving or use as a wardrobe closet according to customer needs. The overall floor to ceiling measurement will be the standard 8' 6" (60" of shelving or closet unit plus the filler unit from there to ceiling).

25X1A5a1

5. The government sales representative of [REDACTED] advised that design drawings will be provided as soon as they tested the suspension system prototype.
