Cotin, A.

TITLE:

A comparative examination of error estimates of some formulas for the numerical integration of differential equations

PERIODICAL:

Referativnyy zhurnal, Matematika, no. 1, 1962, 26-27,  
abstract 1V135. ("Lucrări științ. Inst. politehn. Cluj."  
Cluj. 1960, 31-42)

TEXT: The author compares the error estimates for approximate solutions of the equation  $y' = f(x,y)$ ,  $y(x_0) = y_0$  obtained by various methods. It is required that the right-hand side  $f(x,y)$  of the equation, together with its partial derivatives

$\frac{\partial^k f(x,y)}{\partial x^l \partial y^k}$  be uniformly continuous in the domain  
 $D \{ |x - x_0| \leq a, |y - y_0| \leq b \}$

and that  $|f(x,y)| \leq N$ ,

Card 1/4

A comparative examination of error ...

S/044/62/000/001/047/061  
C111/C222

$$\left| \frac{\partial^k f(x,y)}{\partial x^1 \partial y^k} \right| \leq \frac{M}{N^{k-1}}, \quad aN \leq b, \quad aM \leq 1.$$

Formulas of the third and fourth orders of exactness are considered; in the first case  $0 < r \leq 3$ , in the second  $0 < r \leq 4$ . The error estimates of the formula of third order by Runge and Hain are

$$|y_1(x) - y(x)| \leq 3.78 MN \frac{M^3-1}{M-1} (x-x_0)^4$$

and

$$|y_1(x) - y(x)| \leq 1.371 MN \frac{M^3-1}{M-1} (x-x_0)^4$$

respectively. For the two formulas of fourth order by Kutta:

$$y_1(x) = y_0 + \frac{x-x_0}{6} (k_1 + 2k_2 + 2k_3 + k_4)$$

where

Abstract: [English summary modified]: Report of listerellosis (*Listeria monocytogenes*) in pigs and sheep, 1961 and 1962: Symptoms were predominantly those of the central nervous system affection, explainable by finding of abscesses only in the brain and in the medulla upon necropsy. In 9 foci of sheep, morbidity in the individual heard was 2-4%. There were no abortions. 1 Soviet and 7 Rumanian references.

AUTHOR: Cotiu, F., Cotiu, A.

TITLE: An estimation of the error of the Kutta method of fifth order for the numerical integration of differential equations

PERIODICAL: Referativnyy zhurnal, Matematika, no. 5, 1962, 31, abstract 5V155. ("Studia Univ. Babes - Bolyai. Math.-phys.", 1960, no. 1, 193-198)

TEXT: The differential equation

$$y' = f(x, y)$$

with the initial condition  $y(x_0) = y_0$  is numerically integrated by the formula

$$y_1(x) = y_0 + \frac{x-x_0}{144} (17k_1 + 100k_3 + 2k_4 - 50k_5 + 75k_6)$$

where

$$k_1 = f(x_0, y_0), k_2 = f\left[x_0 + \frac{1}{5}(x-x_0), y_0 + \frac{1}{5}k_1(x-x_0)\right]$$

Card 1/2

S/044/62/000/005/036/072  
C111/C444

An estimation of the error of ...

$$k_3 = f \left[ x_0 + \frac{2}{3} (x - x_0), y_0 + \frac{2}{5} k_2 (x - x_0) \right]$$

and where analogously some more complicated expressions hold for  $k_4$ ,  $k_5$ ,  $k_6$ . For the first step of integration an estimation for the error

$$|y_1(x) - y(x)| \leq 6320MN \frac{M^5 - 1}{M - 1} (x - x_0)^6$$

is given, where

$$|f(x, y)| \leq M, \quad |\partial^k f(x, y)/\partial x^i \partial y^j| \leq MN^{1-j} \quad (0 < k \leq 5).$$

One points out the fact that in the praxis the Nyström-method of the same order of exactness should be preferred the Kutta-method, since the error at Nyström being about 2.4 times smaller then the analogous error of the Kutta method. Bibliography with 14 titles.

RUN/3788

Cluj, Transylvania. Institutul Politehnic

Lucrări științifice (Scientific Works) Cluj, Intreprinderea Poligrafica, 1959.  
637 p. Errata slip inserted. No. of copies printed not given. No  
contributors mentioned.

PURPOSE: This book is intended for mathematicians, physicists, chemists, and  
civil and mechanical engineers.

COVERAGE: The book consists of 59 papers by Rumanian specialists on problems in  
science and technology, particularly mathematics, physics, chemistry,  
metallurgy, civil and mechanical engineering. Summaries in Russian and  
French or German are given at the end of each article. Some of the articles  
are accompanied by references. No personalities are mentioned. At the back  
of the book there are 23 references, all Rumanian.

TITLE: Constructing some highly accurate numerical integration methods for differential equations.

PERIODICAL: Referativnyy zhurnal. Matematika, no. 10, 1962, 23, abstract 10V118 (An stiint, Univ. Iasi, v. 6, no. 3, sec. 1, 1960, supl., 585 - 598; Rum.; summaries in Rus. and French) ✓A

TEXT: Using some ideas of Runge and König the author constructs highly accurate methods for the numerical integration of the differential equation  $z' = \psi(x, z)$ ,  $z(x_0) = z_0$  (1) requiring a comparatively small number of substitutions in differential equation (1). Thus by utilizing the relation  $z = y + z'_0(x - x_0) + \frac{1}{2}z''_0(x - x_0)^2 + \frac{1}{6}z'''_0(x - x_0)^3 + A(x - x_0)(y - y_0)$   $+ B(x - x_0)^2(y - y_0)$  the author gets a method of the seventh order of accuracy, requiring only two substitutions in equation (1). TITLE: Checking the automatic start conditions of short-circuited asynchronous electric motors

SOURCE: Electrotehnica, no. 5, 1965, 173-177

TOPIC TAGS: electric motor, electric engineering

ABSTRACT: After a brief description of the automatic starting mechanism, the author describes a calculation method to be used for checking the automatic start condition of short-circuited asynchronous motors which have accidentally become disconnected, and gives a numerical example of the calculation. Some suggestions are also given for improving automatic starting performance in general. Orig. art. has: 4 figures, 11 formulas and 1 table. [Based on author's Eng. abst.]

TITLE	Studies on the Effect of Subsidence on the Properties of Sewage	
ORG. PUB.	Hidrotehnica, 4, No 2, 62-65 (1959)	
ABSTRACT	The results from tests carried out during different seasons of the year are given. It has been established that 2-hr settling lowers the concentration of coarse particles (CP) by 70%; increasing the settling time to 3 hrs results in an insignificant increase over the latter figure. The oxygen demand of the sewage is decreased by 40%. The lack of correlation between the lowering in the concentration of CP and in oxygen demand is explained by the decomposition of organic impuri-

Orig Pub : Studii si cercetari endocrinol. Acad. RPR, 1956, 7, No 2,  
253-255  
Abstract : This is a case of a three-year old female infant with the syndrome of adrenocortical hyperfunction. Beginning at 3 months there was rapid weight gain, deposition of fat on the trunk and face, hypertension, and hypertrichosis with growth of hair on the forehead, cheeks, upper lip and around the genitalia. A tumor the size of a fist was detected in the left renal area. There was an increased

Abstract : The state factory of balances at Prague put on the market batch measuring hoppers and dosimeters for liquids of the  $\text{HNO}_3$  type working on the same principle. The measured amount of the substances (by weight) is fixed by a movable load on the balance beam. The dosimeter is placed under the store, from which the measured substances flow into the measuring device. A system of
