TITLE: Contributions to the study of the incidence of dysenteric etiology in acute digestive disorders

SOURCE: Microbiologia, parazitologia, epidemiologia, v. 10, no. 1, 1965, 27-32

TOPIC TAGS: digestive system disease, bacteria, gastroenterology, bacteria disease

ABSTRACT: In 117 subjects with acute digestive disorders, the authors established dysenteric etiology in 44 percent of the cases by isolation of the dysenteric bacillus from the faeces. Because of the many similarities between dysentery and various digestive disorders with polymorphous diarrhoeic syndromes, the authors suggest that such disorders should be comprised in the category of dysentery so that true dysenteric cases will not be missed when taking prophylactic measures. EXCERPTA MEDICA Soc 15 Vol 13/6 Chest Lis. June 60

1446. THE EFFECT ON PULMONARY RESPIRATION OF SMOKING 3 CIGARETTES CONSECUTIVELY - Cercetări privind efectul fumatului consecutiv a 3 țigarete asupra respirației pulmonare - Iota C., Bonachi A., and Racoveanu C. - PROBL. TER. (București) 1958, 9/3 (83-87) Tables 2
The author measured the minute ventilation at rest, the O₂ uptake and the CO₂ output in 60 subjects (20 non-smokers, 10 smokers from 0 to 10 yr., 10 smokers from 11 to 20 yr., 10 smokers from 21 to 30 yr. and 10 smokers from 31 to 50 yr. before and after smoking 3 cigarettes consecutively. They found that the alterations of the pulmonary function are dependent upon the duration and the rate of smoking and may be the result of a summation phenomenon.

 Abstract : The experiments comprised 4 groups of fowl,
 each group consisting of 20 young hens and
 cockerels of the Leghorn breed, matched accor-
 ding to sex, age, and live weight. The fowl's
 average live weight amounted to 1,220.5 g.
 All fowl were placed into cages measuring
 85 x 74 x 50 cm². The first group was the con-
 trol group. The fowl of the 2nd group (experi-
 mental) obtained 15 g each of cooked potatoes
 supplementary to the ration, the fowl of the
 3rd group obtained 20 g each of cut mangal-

TITLE: A method for producing epoxy resins, Class 39, No. 172887

SOURCE: Byulleten' izobreteniy i tovarnykh znakov, no. 14, 1965, 76-77

TOPIC TAGS: synthetic material, epoxy plastic, phenol

ABSTRACT: This Author's Certificate introduces a method for producing epoxy resins hardened by anhydrides of unsaturated dicarboxylic acids. Epichlorohydrin is interacted with a phenol in an alkaline medium. Resins with high thermal stability are produced by using dimethylvinylanthranylphenol or cresols or xylenols as the phenol.
