Boltynskiy, A.M. Vasil'yev, B.V. Medvedev, A.D. Myankin, S.M.
Sokolovskiy, (Resp. Ed.), A.G. Postnikov, Yu. V. Proshorov, K.A.
Shtil'man, L. D. Yanov, V.A. Uspenskiy, N.G. Chetayev, G. Ya.
Shilov, and A.I. Shiranov.

PURPOSE: This book is intended for mathematicians and physicists.

COVERAGE: The book is Volume IV of the Transactions of the Third All-
Union Mathematical Conference, held in June and July 1956. The
book is divided into two main parts. The first part contains sum-
maries of the papers presented by Soviet scientists at the Con-
ference that were not included in the first two volumes. The con-
second part contains the text of reports submitted to the editor
by non-Soviet scientists. In those cases when the non-Soviet sci-
entist did not submit a copy of his paper to the editor, the title
of the paper is cited and, if the paper was printed in a previous
volume, reference is made to the appropriate volume. The papers,
both Soviet and non-Soviet, cover various topics in number theory,
algebra, differential and integral equations, function theory,
functional analysis, probability theory, mechanics, mathematical
problems of mechanics and physics, computational mathematics,
mathematical logic and the foundations of mathematics, and the
history of mathematics.
