MEMORANDUM FOR: Director, [REDACTED]
FROM 25X1A : [REDACTED]
Chief, Communications Engineering
SUBJECT : Personnel Safety, [REDACTED] 25X1A
School, SC-3 Satellite Terminal Antenna
Installation (C)
REFERENCE : OCE-M78-137, dated 6 April 1978

25X1A
25X1A

1. (C) Per the 10 April 1978 discussion between [REDACTED] of your staff and Messrs. [REDACTED] and [REDACTED] on my staff, the elevated platform to be built for support of the SC-3 satellite terminal antenna will include the following measures to ensure personnel safety: 25X1A

- A. A chain will be placed across the new steps leading to the platform with an appropriate warning similar to that used on the existing steps.
- B. A personnel safety switch will be located on the antenna structure to prevent the transmitter from being enabled inadvertently from the school classroom.
- C. Provision will be made for inclusion of a nylon rope around the perimeter of the platform at two height levels, supported by vertical stanchions no more than ten feet apart.
- D. Access to the area of the platform covered by the transmit beam will be protected using movable stanchions and nylon rope.
