DOC Waiver Letter In ERU File

We appreciate the interest you have shown in the National Bureau of Standards' Center for Building Technology by your requests for information about our building research. Enclosed for your information is a copy of the National Bureau of Standards Special Publication 446, Building Technology Project Summaries. This report highlights our research activities performed during calendar year 1975.

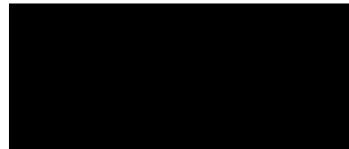

The publication summarizes research projects, identifies research sponsors, characterizes the progress achieved, and provides the point of contact for each project within the Center for Building Technology. Areas covered in this report include: energy conservation, solar energy, building economics, architectural research, building safety, plumbing and drainage, mobile homes, mechanical systems, and building codes and standards.

The other item enclosed is the Center's quarterly newsletter, NEWS, which will be provided on a continuing basis.

I trust you will find these materials informative. We welcome your comments about our building research activities.

Richard N. Wright, Director
Center for Building Technology
Institute for Applied Technology
