

8 JUN 1982

MEMORANDUM FOR: Inspector General

FROM : Robert M. Gates
Deputy Director for Intelligence

SUBJECT : Inspection Report on the
Office of Imagery Analysis

1. We have reviewed the draft of the Inspection Report of OIA. Overall, I am pleased with the results of the inspection. Although there are several areas which were identified during the IG survey that need OIA management attention, these are relatively minor. I believe virtually all can be resolved, many in the near term. [redacted] 25X1

2. I would also like to commend the Office of the Inspector General for the highly professional manner in which the IG team conducted its investigation of OIA. OIA management has, on more than one occasion, brought this to my attention. The team conducted a comprehensive study of OIA, was not disruptive to daily office activities, required relatively little support from OIA personnel, and provided constructive feedback to OIA management. [redacted] 25X1

3. Our comments on the first recommendation in the IG report are presented below, and comments on various sections of the entire report are in the attachment. In addition, OIA has already forwarded to the IG team some suggested changes regarding classification of the report. [redacted] 25X1
