MEMORANDUM FOR THE RECORD

SUBJECT: CIRIS-72 Data Call for DOD

1. When Messrs. Tweedy and [redacted] returned yesterday afternoon from seeing Dr. Hall, they called Admiral Showers and me to the front office to tell us that Dr. Hall had agreed to a CIRIS data call for EY-72. Hall is to have a CIRIS briefing sometime next week - not yet scheduled. Don't know who he will bring; may bring Program Managers.

25X1

2. Mr. Tweedy told me to be ready to handle the 1st part of the briefing, primarily factual and historical. Showers to do the latter part, focusing on specific use or potential use of CIRIS, improving the utility as a community tool, etc. Tweedy wants a dry run before the real show. *Sub consult for DCI + DOD. Showers shld focus on real world practical uses.*

3. Mr. Tweedy said that I could release my mock-up CIRIS Instructions to GDIP so that they could get started internally. Likewise, can make available CIRIS-72 forms if they are desired.

4. We are to prepare proposed implementing letter. Not clear to me whether this should be signed by DCI, or Tweedy, or Hall (for DOD); in any event, I am going to put together a draft, and I intend to pattern it on the DASD(I) promulgating letter for last year's CIRIS. I will be checking this with Showers. Also will review this with Hurwitz when I have a draft. Also it may well be desirable to show this to Segal in advance so that he can keep his people in line and calm. I plan no contact with DASD(I) staff.

5. I mentioned to Mr. Tweedy transmittal to CIA (Mr. Colby) and State (Mr. Cline). Mr. Tweedy said that he wanted to take care of ASD(I) first. Therefore, I told [redacted] this morning to keep working on his own briefing paper and specific comments for his front office, but try to keep Briggs from getting a Colby briefing or transmittal from us to Colby pushed too fast. [redacted] can handle this, he thinks. I am calling John Thro, State, to arrange for him to get a copy of my CIRIS-72 mock-up notebook.

6. I had Charlene confirm with Printing people today that they are giving us their best efforts. I have asked for printed copies of the CIRIS Annexes by the middle of next week -- ca 23 Feb. 72.
