CONTENTS AND SUMMARY OF EVENTS
(October 1975)

Highlights

- The USSR signed its first economic cooperation agreements with Cyprus and the Malagasy Republic. The amounts of aid involved were not specified.
- Peking extended its first aid to Gabon, a \$25 million credit.
- Eastern Europe pledged aid to the Congo and Egypt totaling \$35 million.
- Morocco ordered a slowdown in economic negotiations with the USSR to limit increases in Soviet activities in Morocco.
- Peru is considering major new purchases of Soviet arms.
- The USSR has agreed to provide Syria with additional sophisticated weapons.

COMMUNIST AID AND TRADE ACTIVITIES
IN LESS DEVELOPED COUNTRIES
OCTOBER 1975

IRAN-USSR ECONOMIC RELATIONS CONTINUE TO WARM

Soviet-Iranian economic relations are entering a new phase as Tehran, with its increased wealth, is shedding its client status. A recent agreement calls for cooperative efforts to undertake, in both countries, projects whose estimated eventual cost could run as high as \$3 billion. Tehran also became an aid donor, when it recently agreed in principle to provide credits for a paper complex in the USSR.

Soviet Economic Aid to Iran, 1963-75

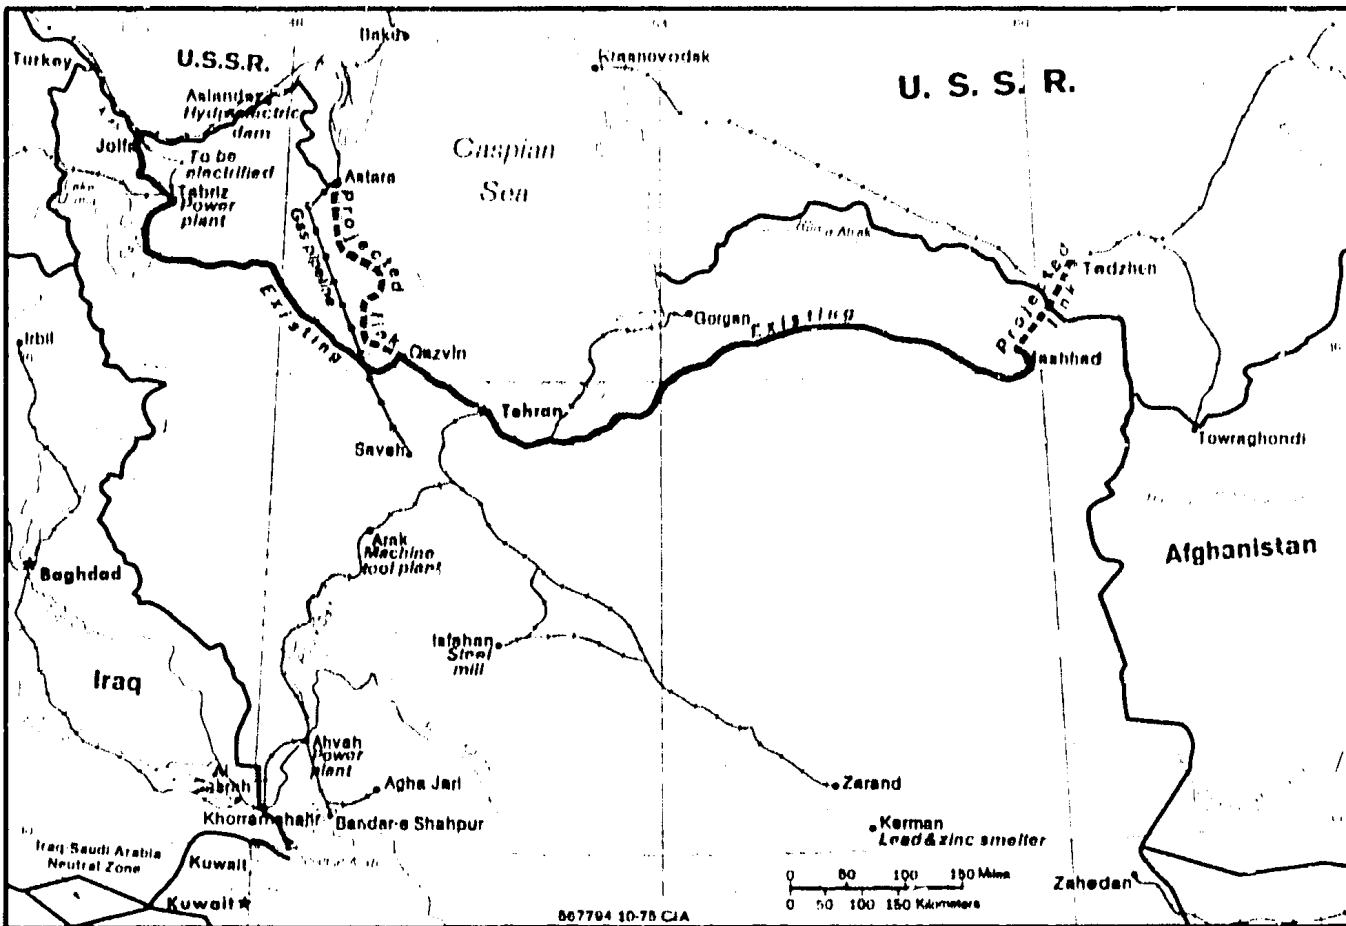

The changing relationship is built on more than a decade of mutually beneficial arrangements made possible by their common border. Beginning with an agreement in 1963 to build a border dam, Soviet aid has expanded to about \$800 million and includes a steel mill, a gas pipeline, and smaller industrial and agro-industrial facilities (see the map).

The dam's power and water for irrigation is allocated in equal shares to Iran and the USSR. The gas pipeline from the Iranian gas fields to the Soviet border enables Iran to sell a former waste product to service its economic and military debt to the USSR. Moscow is using the gas to meet the growing energy requirements in Azerbaijan and the Transcaucasus while saving the costs of transporting gas from distant fields. The gas deal also allows the release of some Soviet gas for sale at higher prices in Western Europe. The steel mill was provided by the Soviets at a time when no other country was willing to finance it. Projects contemplated under the 15-year cooperation agreement signed in 1972 are a further expression of their mutual economic interests. A second border dam and gas pipeline are planned, and capacity at the steel mill is to be nearly tripled by 1978; September protocols provide for electrifying a 90-mile line from Tabriz in Iran to Jolfa on the Soviet border and for studies to build a 100-mile railroad from Mashad in Iran to Tedzhen in the USSR. Negotiations also are in progress for another 200-mile line from Qazvin

SECRET

to Astara, on the Soviet border. These transport links will help accommodate the growing Soviet-Iranian trade as well as the increasing amount of East European goods being shipped to Iran through the USSR.

Some of these new projects will likely be covered by the \$250-\$300 million in aid still outstanding under old credits. Moscow has usually carried through with its aid pledges despite changing circumstances and will be willing to accept payment in natural gas. Some will likely be financed by Iran or jointly, but the Soviets will continue to provide the equipment and technical assistance.

Military Aid

Although Tehran relies on the West for all sophisticated weapons, it has purchased \$825 million of Soviet military support equipment and arms since 1967 for its ground forces. The ability to pay for military goods with natural gas was an important factor in Iran's decision to buy this equipment.

Soviet-Iranian Trade*

The rising trade between the two countries has reflected the expanding Soviet aid program. By 1973, trade had risen to eight times the 1962 level; total trade shot up another 75% in 1974. For the first time in three years the USSR ran a nonmilitary trade surplus—\$47 million (see the tabulation)—as increased exports of machinery and equipment, building materials, chemicals, and edible oils exceeded expanding imports.

	<u>Million US \$</u>	
	1973	1974
Soviet exports	185	351
Soviet imports	188	304
Natural gas	91	175
Other	97	129
Nonmilitary trade balance	-3	+47

The trade is small when viewed as part of each country's total foreign trade. It is less than 3% of both Soviet exports and imports and 1% and 5% in the Iranian case. Iran in 1974, nevertheless, was the USSR's third largest trading partner in the developing world. (Secret Noform) ■

* * * *

SOVIET ARMS SALES TO PERU

Moscow has mounted a campaign to increase arms sales to Lima, its only Latin American military aid client. Previous Soviet arms agreements with Peru, totaling as high as \$130 million, were concluded with the army. The Peruvians now are considering Soviet offers made to an all-service delegation that was in Moscow in August.

Lima has expressed an interest in air defense equipment—radar, anti-aircraft artillery, and missiles—and MIG-21s. The navy, which has sidestepped previous Soviet overtures, also is considering up to six Osa or Nanuchka class guided-missile patrol boats.

Previous Soviet Arms Deals

The Soviet-Peruvian military supply relationship dates back only to 1973, when Lima turned to Moscow because of continuing restrictions on US sales and the inability of West European countries to meet Lima's requested delivery schedules for equipment.

* Data are from official Soviet foreign trade yearbooks.

SECRET

Soviet prices and repayment terms were also favorable—10 years at about 3% interest—and acceptance of Moscow's military aid confirmed Lima's "nonaligned" stance. Lima has signed two agreements thus far with the USSR.

- The first, in 1973, included more than 200 T-55 tanks and 122-millimeter (mm) and 130-mm howitzers. Truck-mounted BM-21 rocket launchers and ZSU-23-4 antiaircraft guns were also delivered.

ZSU-23-4 23-MM Self-Propelled Antiaircraft Gun

- The second, concluded early this year, is a \$30 million order for 30 MI-8 helicopters, all delivered.

Although initially satisfied with Soviet ground equipment, Peru now is facing problems with tank maintenance because of the need for frequent repairs and a lack of spare parts. The Peruvian army is uneasy over the growing number of Soviet military advisers that accompany arms arrivals and the extensive training of Peruvians in the USSR. About 50 Soviet advisers are now in Peru and about 150 Peruvian military personnel are training in the USSR.

Outlook

Peru is also discussing arms purchases with a number of Western countries, including the United States, but these sources cannot match the combination of price, credit terms, performance, and delivery schedules of the Soviet equipment offers. Thus, despite its preference for Western equipment and Lima's concerns over

the Soviet presence, we expect recent Soviet-Peruvian discussions to result in orders for high performance aircraft and naval vessels. Moscow would like to demonstrate its ability to compete in this market in order to stimulate sales elsewhere in Latin America. (Secret Noform) ■

* * * *

SOVIET TRADE WITH LESS DEVELOPED COUNTRIES, 1974

Soviet-LDC trade increased in 1974 but at a slower pace than in 1973. Most of the growth resulted from higher prices rather than volume gains. Soviet 1974 imports from LDCs reached \$3.3 billion (see the chart and the table), up more than a third from the previous year mainly because of rising prices for oil and other primary products. Exports rose more slowly, up 17% to \$4.8 billion, as a consequence of reduced military deliveries. These trends caused the Soviet trade surplus with the LDCs to shrink from \$1.7 billion in 1973 to \$1.5 billion in 1974. As in previous years the main ingredient of the Soviet surplus was military sales. In 1974 the Soviets ran a \$0.5 billion deficit in nonmilitary goods sales to the LDCs, which was offset by nearly \$2 billion in military goods deliveries.*

Soviet Foreign Trade with LDCs, 1974

*Difference between total reported Soviet exports to LDCs and the summation of identified Soviet exports to LDCs.

568007 11-76

Moscow's Trading Partners

LDCs accounted for about 15% of Soviet trade in 1974, the same as in 1973. The Soviet share in LDC global trade, however, fell slightly to 2%.

* Soviet exports cannot be fully identified by either type of commodity or destination. A large difference exists between what the Soviets report as total exports to LDCs and the total derived by adding amounts they list for individual LDCs. We believe this export residual include mostly military goods.

1. Data are from the official Soviet foreign trade yearbook for 1974, converted at \$1.35 per ruble for 1973 and \$1.32 per ruble for 1974.

2. Greece, Malta, Portugal, and Spain have been added to the LDC total shown in the yearbook.

3. Residuals are computed by subtracting the summation of trade for individual less developed countries from the total for Soviet-LDC trade listed in the foreign trade yearbook.

India, Egypt, Iran, and Iraq together accounted for about a half of Soviet 1974 trade with the Third World. Egypt relied most heavily on this exchange as 25% of its trade was with the USSR: India's share was 8%, Iraq's 6%, and Iran's 3%. Moscow ran nonmilitary trade deficits with all these countries, except for Iran.

Elsewhere, rising prices accentuated Soviet deficits with major raw materials suppliers. Moscow's traditionally large deficit with Malaysia grew as rubber prices spiraled. Although Moscow was able to ease its Latin American deficit through oil sales to Brazil, the deficit remained at more than \$250 million because of large agricultural purchases from Argentina and Brazil.

Price increases also affected traditional trading patterns. Soviet nonmilitary trade with Syria showed a deficit for the first time because of higher prices paid for Syrian oil and cotton. Nigeria was propelled into second place among African partners because of a 65% increase in the price of cocoa beans. Algeria, which imported more Soviet building materials and edible oils at higher prices, remained Moscow's largest African trading partner. Petroleum exports to Morocco helped to increase the USSR's usual surplus with Africa. (Unclassified)■

OTHER ACTIVITIES

Economic

Africa

General. Romanian economic relations with the Third World focused on African countries. Bucharest signed its first trade and cooperation agreements with Guinea-Bissau and signed an annual trade protocol with Guinea. Increased Romanian economic activity is envisioned under protocols signed with Sudan and Mali. In Sudan, Romania will participate in developing machine building, chemical, mining, and timber industries, presumably to be financed under a 1971 \$75 million credit agreement. A series of joint ventures in mining, petroleum, light industry, and agriculture are planned in Mali. A team of Romanian geological experts is expected soon in the Ivory Coast, following October discussions on mining cooperation. (Unclassified)

During October, the USSR inaugurated service on a new shipping line serving East African ports. (Unclassified)

Algeria. Under a \$68 million contract, Czechoslovakia and East Germany will jointly build a factory to produce pumps for water, chemical processing, and petroleum. The terms of the contract are probably commercial. (Unclassified)

Congo. Bulgaria agreed early in October to provide \$10 million in credits for Congolese development projects. Contracts were signed for feasibility studies on stock-breeding complexes, and a joint company was established for exploration and exploitation of phosphates and other minerals. (Unclassified)

Gabon. On 21 October, China agreed to provide \$25 million in credits to Gabon for agricultural machinery and light industrial projects. The terms are somewhat harder than for most recent Chinese agreements - 5 years' grace followed by 10 years for repayment. (For Official Use Only)

Guinea. Guinea has terminated its bilateral clearing account arrangements with Bulgaria, Czechoslovakia, and Romania and plans to renounce all of its remaining clearing agreements. A hard currency trade and payments agreement signed with Romania on 2 October is expected to serve as a prototype for agreements with other Communist trading partners. Guinean trade officials claim that its exports to Communist countries have been undervalued and that hard currency settlements will enable it to maximize the benefits from that trade. (For Official Use Only)

Liberia. The USSR told the Liberians it was willing to finance a fishing venture, a citrus processing plant, and an animal feed plant. The fishing project includes trawlers, modification of docking facilities, and construction of a processing plant. Liberian officials are expected to veto the Soviet proposals. (Secret Noform)

Libya. The October visit of the Czech premier to Libya apparently dealt largely with political issues. The only economic agreement calls for establishing an interministerial commission to study means to broaden industrial cooperation. (Confidential)

A Libyan oil delegation in Bucharest signed agreements to obtain Romanian equipment and technical assistance for oil drilling and exploration and for the construction of petrochemical and fertilizer plants. The terms of the agreements were not revealed. (Unclassified)

Malagasy Republic. The USSR and the Malagasy Republic signed an economic cooperation agreement in October under which the USSR will provide a 150-kw transmitter, educational equipment and technical assistance, a feasibility study for a cement plant, and assistance for mining research. The USSR also agreed to study Malagasy proposals for a dam, agro-industrial projects, and road construction. A trade agreement signed at the same time calls for establishing a Soviet commercial office in Tananarive to expand trade between the two countries. (Confidential)

Morocco. The Moroccan government has ordered a slowdown in economic aid negotiations with the USSR. It wants to limit any increase in Soviet activities or presence in Morocco at this time. Negotiations on the Meskala phosphate development project reportedly will be affected by the new instructions. The agreement for the project was scheduled for signature by the end of 1975. (Secret Noform)

Nigeria. A team of Chinese technicians arrived in Lagos to assist in the development of small-scale metal, woodworking, and leather industries in Nigeria. (Unclassified)

Rwanda. A Rwandan delegation was in Peking in early October, probably to discuss procurement of commodities under Rwanda's \$22 million Chinese credit. (Unclassified)

Somalia. Somalia and Hungary signed their first long-term trade agreement and a technical assistance agreement during the visit of the Hungarian President to Mogadiscio. Hungary has promised aid in agriculture, animal husbandry, and technical training. (Unclassified)

East Asia

Burma. A 21-member Burmese government industrial delegation arrived in China on 24 October, probably to discuss Chinese economic assistance proposals reportedly made to the Burmese Foreign Minister in September. (Confidential)

Indonesia. A team of Soviet engineers recently completed a study for a hydroelectric plant in Indonesia, the first of six projects planned under an economic agreement concluded last December. A contract is expected to be signed by the end of the year. (Confidential)

SECRET

Philippines. The Philippines announced that a Soviet delegation is expected in Manila in November to continue negotiations on the establishment of diplomatic relations. (Unclassified)

Singapore. An official trade delegation departed for a two-week visit to China at the invitation of Chinese trade officials. Members include government officials and representatives of Singapore's manufacturing, trading, and banking sectors. (For Official Use Only)

Europe

Portugal. During President Costa Gomes' October visit, the USSR and Poland promised no aid and deferred final decisions on trade deals. In mid-October the USSR did agree to purchase about \$18 million worth of agricultural goods, and Poland continued discussions on contracts for repairing Polish ships and constructing transport equipment in Portugal. Warsaw also is considering an agreement to provide technical assistance to Portugal's fishing industry. (Confidential Noform)

The first session of the Bulgarian-Portuguese Joint Economic Commission resulted in long-term agreements on economic cooperation and merchant shipping. (Unclassified)

Latin America

Argentina. The East German Foreign Trade Minister arrived in Argentina on 14 October for talks on expanding trade. Formal trade exchanges between the two countries were renewed last year following a 12-year hiatus. (Unclassified)

Brazil. Romania has offered petrochemical plants to Brazil under 12-year credits similar to the \$150 million credit extended earlier this year for steelmaking equipment. (Unclassified)

Mexico. On 1 October Mexico and the USSR signed an agreement on joint research in nine fields, including energy, geology, and oceanography. (For Official Use Only)

Peru. On 30 September, East Germany announced the purchase of \$28 million of Peruvian metals, including copper, silver, and zinc, the first major order under a May agreement to expand trade. (For Official Use Only)

SECRET

SECRET

Hungary recently extended Peru a \$10 million suppliers credit for wheat and other food. Repayment is due two years after delivery at 7% interest. (Unclassified)

Near East and South Asia

Afghanistan. The USSR and Afghanistan recently signed contracts for Soviet project surveys that will be financed under a 1975 aid agreement. Surveys will be made for four bakeries, a large grain silo in Mazar-i-Sharif, and two flour mills. (Unclassified)

Cyprus. On 1 October Cyprus announced its first economic and technical cooperation agreement with the USSR. The new accord puts no dollar value on the assistance, but is a general framework agreement under which Moscow will extend credits for specific projects after studies are completed. Projects mentioned include dams and a new airport at Nicosia. Earlier this year Cyprus bought two fertilizer plants from the USSR under long-term credits. (Unclassified)

Egypt. On 30 September Hungary extended \$25 million in five-eight year credits for machinery and equipment for Egyptian development projects. Egypt and Hungary also agreed to settle their trade accounts in hard currency beginning 1 January 1976. (Unclassified)

India. The Soviet Union will begin delivery in 1976 of \$20 million worth of equipment for the Mathura oil refinery. Financing for the 120,000 b/d plant is from a 1966 Soviet credit. (Unclassified)

Iran. A 4 October protocol provided for the Bulgarian sale to Iran of railroad passenger cars, 400 freight cars, and various agricultural products. The two sides also plan to cooperate in agro-industrial enterprises in Iran under \$20 million in previously extended Bulgarian trade credits. A delegation will visit Tehran soon to discuss these projects, including poultry raising, dairies, and canning plants. (Unclassified)

Prague has agreed to supply equipment to expand the Czech-built Tabriz machine tool plant and construct several agricultural projects. In return, Tehran will sell machinery and possibly gas to Prague. A joint ministerial commission will meet later this year for further discussions on these projects. It also will consider new Czech proposals to set up a brass factory and cement and power plants in Iran. (Confidential)

SECRET

Under a Polish-Iranian agreement signed in October annual trade is expected to rise to \$100 million through increased exchanges of Iranian industrial goods and Polish agricultural products, fertilizer, and ships. Poland also agreed to set up projects in Iran, including textile and sugar mills and a tin concentration plant. A Polish delegation is expected in Iran soon to discuss additional project proposals including a cheese factory in Iran and a paper mill in Poland. Tehran reportedly agreed to provide a \$200 million advance payment to obtain needed Polish goods. (Unclassified)

Iraq. On 3 October the USSR signed a contract to modernize a nuclear energy center in Iraq, under a June 1975 agreement for cooperation in the peaceful uses of atomic energy. Financial arrangements for the project were not disclosed, but a Soviet foreign aid organization is involved. (Secret Noform)

The Chairman of the Polish State Council paid a mid-October visit to Iraq to discuss Polish economic aid for various projects presumably under a 1972 \$100 million credit. The joint Iraqi-Polish Commission will continue these discussions at its annual meeting in early December. (Unclassified)

The USSR and Iraq recently signed a contract for exploitation of the Lunais oil field in southern Iraq, expected to produce at least 50,000 barrels of crude a day. The USSR has done exploratory work in the field under credits extended in 1969 and also will help construct a gas separation unit, a pumping station, storage tanks, a power plant, and a 50-60-mile pipeline connecting the new field with other Iraqi pipelines. Financing arrangements for the estimated \$50 million program were not announced. (Unclassified)

Jordan. On 19 October Romania signed further agreements to expand the Az-Zarga oil refinery. The two sides also discussed Romanian participation in oil and water prospecting, a new oil refinery, a cement plant, and several agricultural projects, probably on commercial basis. (Unclassified)

Kuwait. Kuwait has concluded two agreements with Poland, one on economic and technical cooperation, the other on trade and payments. Poland will cooperate in developing Kuwait's petrochemical industries, presumably with a view to securing long-term supplies of Kuwaiti oil. (Unclassified)

Pakistan. An aid protocol signed in late October portends increased Romanian participation in Pakistan's industrial development under \$56.5 million of credits extended in July 1973. Romania will help set up 2 dairy, textile mills, and food

preservation and storage plants and will drill for oil near Rawalpindi. Romania also expressed interest in helping construct an oil refinery at Multan and conducting phosphate exploration in the Hazara district. (Unclassified)

South Yemen. The USSR and South Yemen recently signed contracts for Soviet aid for petroleum exploration. Moscow will prospect for oil in the east and conduct an aerial geophysical survey, under a 1972 \$40 million credit agreement. (Unclassified)

Military

Africa

25X1B

Mali. Mali received [redacted] MIG-15s, via Guinea, under a December 1974 agreement, and Moscow was preparing to ship Mali's [redacted] AN-26 transport aircraft under a 1975 agreement. (Secret Noform)

25X1B

25X1B

Morocco. The USSR made deliveries in October of rocket launchers, [redacted] trucks, and small arms contracted for by Morocco in July. (Confidential)

Nigeria. In October Moscow completed the first phase of deliveries of MIG-21 aircraft expected under a 1974 agreement with Nigeria. Since July, Lagos has received at least [redacted] MIG-21 Fishbed aircraft (of which at least [redacted] are ready for operation). Nigeria will receive an additional [redacted] aircraft under the same agreement. In December, 23 Nigerians will begin training on these aircraft in the USSR. (Secret Noform)

25X1B

25X1B

25X1B

Tanzania. Peking currently is helping Tanzania to construct a military and political academy at Munduli. The school, scheduled for early 1976 completion, has a planned enrollment of 960 cadets. (Unclassified)

25X1B

The USSR recently delivered [redacted] 130-mm artillery pieces and an unknown number of SAM-7 missiles. The equipment, part of a \$40 million 1974 agreement, was accompanied by 15 instructors. (Secret Noform)

25X1B

25X1B

Zaire. During October, Zaire received [redacted] 130-mm guns, [redacted] jeep-mounted rocket launchers, and [redacted] torpedo boats as grants from North Korea. (Secret Noform)

25X1B

Near East and South Asia
25X1D

25X1D

South Yemen. Moscow delivered [redacted] MIG-21 aircraft to Aden in late September, 25X1B part of a 1973 \$35 million agreement, bringing to [redacted] the number delivered to 25X1B South Yemen this year. (Secret Noform)

Syria. The USSR concluded a major new arms agreement with Syria, during President Asad's October visit to Moscow. Asad was seeking MIG-25 reconnaissance aircraft, as well as additional MIG-23 jet fighters and surface-to-air missile equipment. Acquisition of the MIG-25 Foxbat would be a feather in Asad's political cap both as a demonstration of Syrian strength and of Soviet support for its policies. (Confidential)

Since midyear, Syria also has signed at least two important arms agreements with Czechoslovakia. In June, Damascus contracted to buy [redacted] trucks, mainly Tatra 25X1B 148s for towing artillery pieces. Syrian President Asad's September trip to Prague reportedly resulted in an order for L-39 jet trainer aircraft and possibly some armored vehicles. (Secret Noform)
