OFFICE OF DATA PROCESSING

#

Strategic Objectives

Develop CAMS2 and Maintain a Responsive CAMS1
Design, Implement, and Bring into Operation the 4C System
The Automatic Information Management System (AIM) will provide
an electronic mail capability for Agency personnel.

Qperational Objectives

Replacement of the Current Cable Dissemination System (joint OC-ODP objective)

Automatic Information Management (AIM)

OFFICE OF FINANCE

Strategic Objectives

Implement and Automate New or Enhance Existing Financial and Budgetary Processes

Operational Objectives

Selective Audit of Proposals and Contracts
Cash Management
Simplified Travel Accounting Procedures
Revision of Factored Cost Estimates
Development of Uniform Field Financial Accounting System
Automated Vendor Payments

Appreved For Release 2005/07/14 : CIA-RDP87-01146R000200080042-8

1NVOICE PAYMENT MBO FY 1980 Fourth Quarter Status Report

Activity This Period

Millestone

On 10 September 1980 a 930 work order was submitted to ODP to study alternate RQ/ADD procedures. AGCD is to brief ODP on the current RQ/ADD procedure in October for clairty and possible alternatives. The preferred alternative is to electronically transfer obligation data from CONIF to GAS.

To date no decision has been made by Office of Logistics to include all purchase orders in the CONIF data base. Further discussions will be held with Office of Logistics on this procedure and other options that may be available.

- 2. Completed in first quarter. Study revealed no redundant or unnecessary points of audit in AGCD that are covered annually by CSAD.
- 3. Completed in first quarter. Pay cards were eliminated to extent possible. No information that is resident in automated systems is being manually recorded.
- 4. Payment of cost type contracts prior to Contracting Officers approval with approval after the fact is in effect. Acceptability of this payment procedure was Jointly confirmed by OL and OF in July.
- Payment of recurring service-type contracts and purchase orders on "exception basis" is in effect. Acceptability of this payment procedure was jointly confirmed by OL and OF in July.
- 6. The study indicated receiving information in the Inventory Control System (ICS) was not sufficient to meet the audit requirements of AGCD without extensive additional manual research over and above the current procedure.
- Requirements are now being identified to the Logistics Inventory Management System (LIMS) Task Force to include an automated "fast pay" procedure in the LIMS. Unfortunately this system is not expected to be operational for years. In the meantime one manual bandaid system is being devised to apply a manual "fast pay" procedure to pay invoices pertaining to Blanket Purchase Agreements (BPA). All indications are that this system will significantly improve the timely payment of BPA invoices and provide more efficient processing. The practical application of this system is to be tested in the very near future.
- 8. Completed in first quarter. Report is attached to each MBO quarterly report as well as being prepared for OF management on a monthly basis. (Att A & B)

Other

STAT

Daily courier service to deliver receiving reports to AGCD was implemented and is working well.

Discussions are to be undertaken with OL/Supply Division to determine acceptance and specific procedural detail to establish the forwarding of receiving reports directly to A&CD from decentralized and central receiving points prior to entering this information into the Inventory Control System (ICS).

`L/OF Notice is now in process to expand "expedite pay" by the inclusion of warranty clauses in purchase instruments and certificates of compliance on each shipment of material requiring test and inspection.

The incidence of courier pickup of checks from AGCD for hand delivery to vendors has been reduced to a minimum. Hand delivery is only made when a Contracting Officer can assure AGCD that the check will be delivered within two days.

DL/OF Notice is in effect that eliminates the issuance of another 2420 at the beginning of a fiscal year unless there is a change to the original request submitted.

Invoices for non-recurring services that require approval before payment are now sent directly to the Approving Office for signature rather than sending these invoices to their B&F office for distribution. This procedure change has proven to speed up this routing process.

STA^T bonthly visits to

Procurement Division by AGCD personnel to clean up problem invoices (sample isting attached - Att. C) was started in July. It has proved to be very successful. Visits to Procurement ivision were recently stopped due to their large back-log at the end of the fiscal year but will be resumed in couple of months.

One change to contract terms has been undertaken by OL to help speed invoice payments. The variance clause has been expanded to provide funds in CONIF for variances. Heretofore the variance clause provided only for variances in the amount of material that would be acceptable.

No follow up has been made with OL to determine the status of progress being made with vendors to format their invoices in the same manner as the Copier Management Report. The extent to which the report must be sterilized before it could be released to the vendors was the last word received from OL.

Plans for the Next Period

Milestone

1.

Evaluate ODP findings on electronic transfer of obligation data from CONIF to GAS and the alternative RQ/ADD procedure.

Test and implement a new procedure to identify back to the responsible contracting officer via electronic mail (using CONIF III) requesting that they provide additional information needed for A&CD to process Final Invoices and settlement of contracts. In addition a report of delinquent cases will be produced for Chief, Procurement Division for follow-up.

Other

Implement manual fast-pay procedure on BPAs.

Continue to identify any improvements to procedures or systems that will improve the timely payment of invoices and implement changes as they are determined to be advantageous.

Follow up on any outstanding activities.
