PREFACE

This edition of the *Directory of Bulgarian Officials* supersedes CR 84-12524, published in June 1984. It identifies individuals who hold positions in selected party, government, economic, scientific, and public organizations and also provides a guide to the internal structures of some of these organizations.

Dates of Information. The date an individual either assumed or was first identified in a position is listed in the "%`position" column. Dates of birth are listed in the "%`birth" column for selected officials.

Transliteration. Transliteration from Bulgarian follows the system authorized by the US Board on Geographic Names (BGN). The diacritical superscript appearing over the transliterated hard sign is omitted in favor of the simple u, and the soft sign is rendered by an apostrophe. Exceptions to the BGN system include the name of the capital city, Sofia (rather than Sofiya), and streets named for prominent foreign nationals (for example, G. Washington).

Personal Names. Bulgarian personal names consist of a given name, a patronymic, and a family name. This publication includes the full name when known. In most cases, the family name appears first in bold type, followed by the given name and patronymic. If an individual uses the patronymic as a surname, the patronymic appears first in bold type, followed by the given name and the unused last name in parentheses. Some Bulgarian names are followed in parentheses by previously used Turkish names, which have been outlawed.

Additional Directory Entries. The directory lists the political party affiliation for each individual when it is known or can be assumed from the position held. It also includes some military and church ranks. The names of organizational components are standardized. Street addresses and transliterated names are provided for some organizations. Some economic and commercial organizations are listed by cable designation or commonly known transliterated name.

An index to major organizations and a personality index follow the directory listing. Duplicate names in the personality index refer to different individuals.
