Dear [Redacted]

STAT

Thank you for your letter of May 10, 1983, concerning the Federal Capital Improvements Program funding proposal for the Central Intelligence Agency headquarters consolidation. We have advised the full Commission and CIA of your interest and concern in continuing coordination of the project plans, including access improvements.

The current Federal Capital Improvements Program funding proposal for the CIA project is part of an annual routine reporting of long range capital project funding requirements of Federal agencies in the National Capital Region. Its inclusion in the program does not in any way affect the CIA commitment to coordinate further with the surrounding community on plans for the project. The CIA staff has reiterated to our staff in recent discussion that it remains fully committed to such coordination when plans are available. The Commission will not take action on development plans as part of its review of the capital improvements program.

If you have concerns regarding the coordination of the project plans during the coming months, please contact Robert Gresham of our staff, on 724-0191.

Sincerely,

Reginald W. Griffith
Executive Director
