Chief, New Building Project Office, OL

SUBJECT: CIA Computer Study Panel

REFERENCE: Memo for Multiple Addressees fm
C/ECB/HOME/OL, dtd 24 Oct 84,
Subj: Support For CIA Computer
Study Panel

1. The Panel members should be made aware at the outset that there is a unique constraint on how much of our computer resource is removed from Langley. If it is assumed that all computers are removed, then the Agency will be left with approximately 150,000 square feet of space that can not be used effectively. This is a result of the transportation constraints associated with the local road network that prevent us from increasing the employee population after consolidation. This would also reflect on the powerhouse and utility systems since we have sized the capital investment to carry 200,000 square feet of major electronic systems.

2. We are currently estimating approximately 150,000 square feet of computer and communication centers at Langley in 1987. Projected growth rate for these centers is approximately 5,000 square feet per year beyond 1987. This provides a decade of expansion before we again hit the hard limits on utilities. While that would require displacement of approximately 400 employees, it does provide latitude for timing implementation of Panel recommendations to coincide with any expected technological innovations that may be helpful in remoting ADP.

3. To state the obvious, utility systems provided for a remote processing facility should exceed the reliability and survivability of the systems we are providing at Langley if we are to maintain the same level of service to the Headquarters customers.

STAT

FROM:

[REDACTED]
Logistics Representative for Staff
Support to CIA Computer Study Panel

SUBJECT: Support For The CIA Computer Study Panel

STAT

1. [REDACTED] is Chairman of a CIA Computer Study Panel, and the Office of Logistics has been asked to provide an overview of Logistics considerations. The Office of Logistics overview for the CIA Computer Study Panel will be presented to the panel on 5 November 1984. Attached herewith is a draft of the Panel's Charter. While the Logistics overview will address the specific issues listed below, any relevant Logistics data will be provided to the panel in the initial briefing or as subsequently required by the panel.

2. The specific Logistics considerations are:

- a. Facility considerations for a leased or government-owned remote building to house ADP processors/storage.
- b. Possible limits on a remote facility in the Washington Area.
- c. Personnel considerations in selecting remote locations.

3. Please provide by 30 October 1984, any relevant information on Logistics issues to make our input to the panel's study as complete as possible. Information should be sent to Room 3E24 Headquarters.
