Dear Dan:

Will you please approve the purchase of two Fisher film processors. One is required by us in Palo Alto, and the other in Boston. These are required to process film in checking out the instrument and in tests at Boston. Boston does not normally use a processor of this size as they are not required to process such large quantities of film at one time, and in addition, for security reasons the processor must be in the new environmental tests facility being built at Waltham.

The price quoted by the Oscar Fisher Company, Newburgh, N.Y. per unit is as follows:

G6 Film Processing Unit "PROCESSALL"	\$2950.00
Spare Parts: chemical pump	96.00
Two heating units @ \$2.50/ea	<u>5.00</u>
TOTAL	\$3051.00

Please indicate your acceptance by signing and sending one copy of this letter back to me.

Very truly yours,

Jack
