MEMORANDUM FOR THE RECORD

SUBJECT: Visit with Eastman-Kodak, 18 May, regarding U-2R
Export Scheme

25X1

1. [Redacted] and I met with [Redacted] in Rochester, N. Y., 18 May, to go over the Eastman inputs to the U-2R export business. [Redacted] had a list of a good many questions which we thoroughly thrashed out, principally having to do with reaction times on photo processing, distribution of film copies, personnel and financial matters.

25X1

2. A paper had been prepared by them in response to my cable requirement of last week, but in view of the answers to some of their questions, it was apparent they needed to give some additional thought to the matter and to resubmit a new modified proposal.

3. They did give us some preliminary figures which concerned numbers of trailers required on sight, tech rep personnel and equipment and film supplies. The net effect of our discussion was probably to reduce their figures, which at the moment stand at about [Redacted] per detachment with a year's operation to boot. I would suspect that their new figures will be on the sunny side of [Redacted] and the numbers of trailers needed will be correspondingly cut. I suspect that it will be as much as another week before we have a final estimate from them.
