

COMPUTER SECURITY SUBCOMMITTEE
OF THE
UNITED STATES INTELLIGENCE BOARD
SECURITY COMMITTEE

13 MAR 1974

**MEMORANDUM FOR: National Security Agency Member,
USIB Security Committee**

SUBJECT : Commendation [redacted]

STAT

1. [redacted] of your Agency has participated in the activities of the Computer Security Subcommittee of the United States Intelligence Board since June 1969. His role initially was to support NSA's contributions to the Subcommittee's efforts; since April 1972 he has served as the de facto NSA member of the Subcommittee.

STAT

2. During these five years [redacted] knowledge of computer security issues and his appreciation for Community concerns in this area have grown to the point where he is recognized as one of the most experienced voices on computer security matters in the Government. From our association with [redacted] it is apparent that he has reached this experience level mostly due to personal interest, motivation, and dedication to his Agency and to the Community.

STAT

3. In his years of service to the Computer Security Subcommittee he has not only represented the National Security Agency with distinction, but also provided exceptional contributions to our collective Community efforts to address outstanding issues and problems in this most difficult area. Without the input from NSA,

STAT

as developed, coordinated, and presented by [redacted] the Subcommittee could not have proposed the Community policy for releasing magnetic storage media, now before the United States Intelligence Board. I personally feel he is among the most active, most enthusiastic, and most experienced members of the Subcommittee.

STAT

4. Since my designation in 1968 as Chairman of the Subcommittee, I have rarely singled out a participant in our efforts for meritorious commendation. For this reason I take particular pleasure at this time in expressing to you my praise of [redacted] contributions to our efforts and my appreciation for the high calibre of NSA representation on the Subcommittee.
