STAT MEMORANDUM FOR: [redacted]  
 OF/BARS/CLAS

STAT THROUGH : [redacted]  
 OL/BARS/CLAS

FROM : OL/BARS/CLAS - Supply Team

SUBJECT : List of enhancements for Cullinet 1.3 Software

1. Cullinet's 1.3 System appears to satisfy most of our requirements, however there are some Priority I enhancements that are crucial in the performance of our daily tasks but are not present in the 1.3 software.

2. We have separated these enhancements into two Priority I lists - Mandated by Regulation and Mandated by Operational Requirement. In addition, the lists have been prioritized by function. The second list is presented in a flowgraph form that uses the Cullinet 1.3 planned requisition process but has been modified to include the enhancements. The modified portion of the flowgraph includes a brief explanation of the proposed changes by each step.

PRIORITY I ENHANCEMENTS

A. Mandated by Regulation (GAO Title 2)

- 1. General Ledger updates for all applicable Inventory transactions

PRIORITY I ENHANCEMENTS

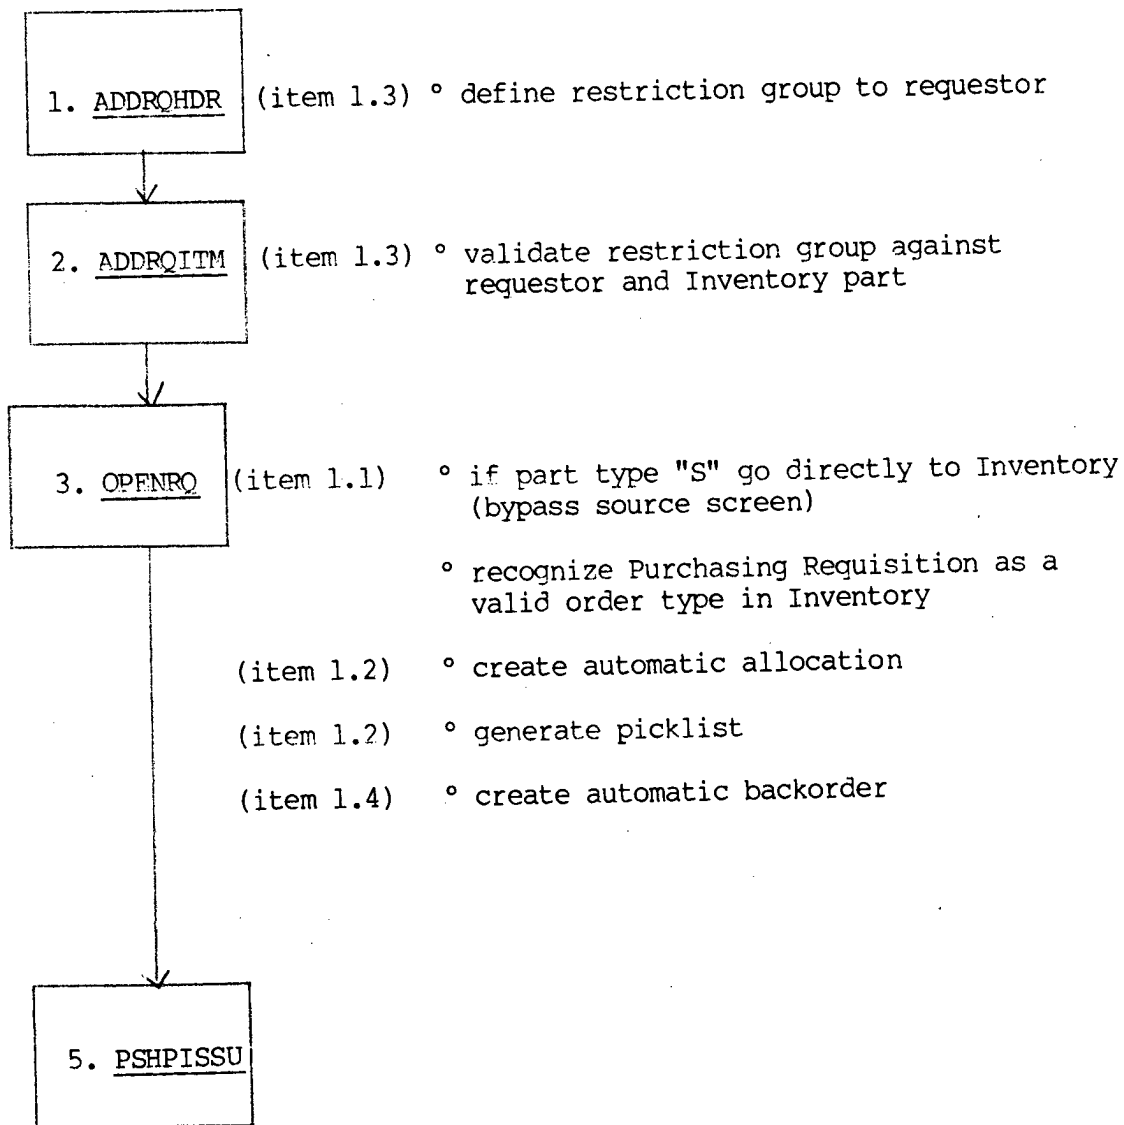

B. Mandated by Operational Requirements

- 1. Ability to transfer funds from one customer account to another customer account based on a requisition for Inventory issue.

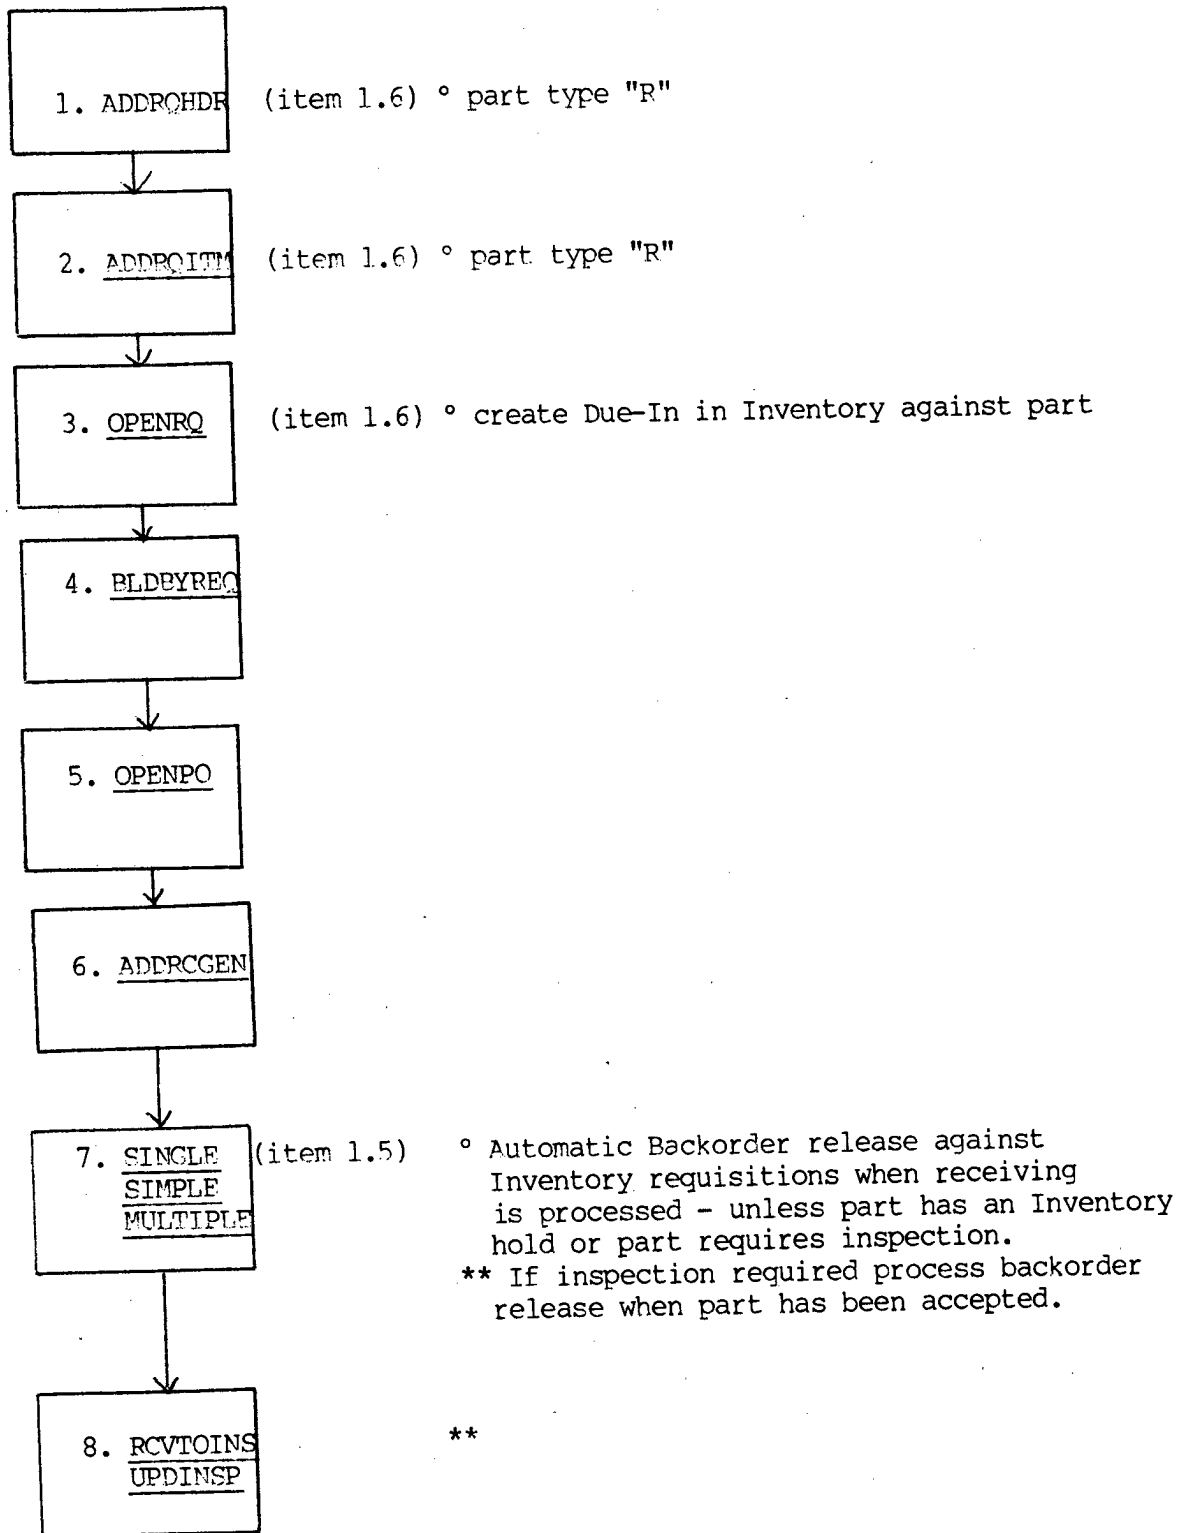

- 1.1 Complete automation of the Purchasing Requisitions for Inventory issues (Single Entry Point)
- 1.2 Automatic Allocation of Inventory Parts against a Purchasing Requisition
- 1.3 Add restriction group against Inventory part number and Requisition Requestor (Function presently available in Order Entry)
- 1.4 Automatic creation of Backorders against Requisitions for Inventory parts
- 1.5 Automatic release of Backorders
- 1.6 Inventory Replenishments
  - option one - create new requisition part type of "P" and create Due-IN when Requisition is opened
  - option two - create Inventory Due-In when Purchase order header and item are added (before OPENPO)

REQUISITIONS FOR INVENTORY ISSUES

INVENTORY REPLENISHMENTS

OPTION ONE - create new part type of "R"

OPTION TWO - create Inventory Due-In when Purchase Order Header and Item are input.  
This is based on the Inventory Manager bypassing the Requisition process and creating a replenishment Purchase Order
