Washington, D.C. 20005

Dear Mr. Wortman:

This follows up on my letter of the 19th concerning whether the NAPA study of civilian personnel systems of the Intelligence Community agencies will cover the issues addressed by two legislative proposals affecting DIA employee benefits.

Based on your telephonic advice, I understand that the proposal to amend the Internal Revenue Code to grant tax treatment of allowances currently provided to NSA and DIA employees overseas comparable to that provided to similar allowances of Foreign Service employees will indeed fall within the scope of the NAPA study. In contrast, the proposal to authorize the Secretary of Defense to provide military attaches with benefits comparable to those already received by Foreign Service officers falls outside the scope of the NAPA study, since the study does not examine or compare uniformed military personnel benefits.

Thank you very much for your timely attention to my questions.

Sincerely,

[Redacted signature]
