Per phone conversation:- my late wife Harriet and I invested forty years and more than prudent personal resources searching through the hundreds of thousands of wars of history, to isolate the tangible control factor which, when controlled, would bring to an end the endless cycles of WAR-PEACE-WAR-PEACE-WAR before soon it may be too late.

If people in power will now listen to what we have to say, in the coming generation people in the intelligence professions . . . instead of being the "whipping post" for all the "peace movements" will become the most highly respected professionals on the planet. Their wives or husbands and children will be proud of them and the community will elevate them to the charisma level as high or higher than doctors.

I welcome pro or con or creative comments or suggestions. Use the enclosed freely. Everything we write is committed to the national security and economic progress of the U.S., or the U.S.S.R. and of all 157 "in-between" nations as air traffic control is committed to the safety and progress of all airplanes in a cloud.

HOWARD G. KURTZ

PS We developed a 30 minute audio-visual introduction which sparks several hours of additional new and creative discussion, if there are people in the CIA willing to stretch their vision in back and forth relaxed discussion.
