99TH CONGRESS
2^D SESSION

S. 2286

To prohibit the sale, donation, or other transfer of STINGER antiaircraft missiles to democratic resistance forces in Afghanistan and Angola unless certain conditions are met.

IN THE SENATE OF THE UNITED STATES

APRIL 10 (legislative day, APRIL 8), 1986

Mr. DECONCINI introduced the following bill; which was read twice and referred to the Committee on Foreign Relations

A BILL

To prohibit the sale, donation, or other transfer of STINGER antiaircraft missiles to democratic resistance forces in Afghanistan and Angola unless certain conditions are met.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*
3 That notwithstanding any other provision of law, no STING-
4 ER antiaircraft missiles may be sold, donated, or otherwise
5 provided, directly or indirectly, to democratic resistance
6 forces in Afghanistan and Angola unless the President certi-
7 fies to the Congress that the proposed recipient has agreed to
8 the following conditions:

1 (1) Physical security of such missiles shall consist
2 of the following:

3 (A) Magazines of reinforced concrete, arch-
4 type, and earth-covered whose construction is at
5 least equivalent in strength to the requirements of
6 the Chief of Engineers (Department of the Army)
7 drawings, 652-686 through 652-693, 27 Dec
8 1941 as revised 14 Mar 42, shall be provided.

9 (B) Lighting shall be provided for exterior
10 doors and along perimeter barriers.

11 (C) Exterior doors shall be class 5 steel vault
12 doors secured by two-key operated high security
13 padlock and hasp (mil spec P-43607), and keys
14 shall be secured separately to insure effective
15 two-man control of access.

16 (D) Fencing shall be 6-foot (minimum) steel
17 chain link on steel or reinforced concrete posts
18 over firm base, and clear zones shall be estab-
19 lished inside and outside fencing.

20 (E) A full-time guard force or combination
21 guard force and intrusion detection system shall
22 be provided.

23 (2) Such missiles shall be accounted for as follows:

24 (A) A 100 percent physical count shall be
25 taken monthly with two-man verification, and

1 records shall be available for United States in-
2 spection.

3 (B) A United States Military Training Mis-
4 sion shall conduct the United States inspection
5 and inventory annually, and weapons expended
6 outside of hostilities shall be accounted for.

7 (3) Movements shall meet United States standards
8 for safeguarding classified material in transit.

9 (4) Access to such missiles and to classified infor-
10 mation relating thereto shall be as follows:

11 (A) Access to hardware and related classified
12 information shall be limited to military and civil-
13 ian personnel who have the proper security clear-
14 ance and who have an established need-to-know.
15 Information released shall be limited to that nec-
16 essary for assigned functions or operational re-
17 sponsibility and, where possible, shall be oral or
18 visual only.

19 (B) No maintenance shall be authorized
20 which required access to the interior of the oper-
21 ational system. Such maintenance shall be per-
22 formed under United States control.

23 (5) The recipient shall report to the United States
24 by the most expeditious means any instance of compro-
25 mise, loss, or theft of any material or related informa-

1 tion. This report shall be followed by prompt investiga-
2 tion and the results provided to the United States.

3 (6) The recipient shall agree that no information
4 on Basic STINGER shall be released to a third gov-
5 ernment or any other party without United States
6 approval.

7 (7) The security standards applied by the recipient
8 to protection of Basic STINGER information and ma-
9 terial shall be at least equivalent to those of the United
10 States at the identified security classification.

11 (8) The recipient shall use the information on
12 Basic STINGER only for the purpose for which it was
13 given.

14 (9) United States officers shall be allowed to in-
15 spect and assess physical security measures and proce-
16 dures established for implementation of these security
17 controls on an announced random access basis.

18 (10) Damaged launchers shall be returned to
19 United States Armed Forces for repair or demilitariza-
20 tion prior to disposal by United States authorities.

21 (11) Two principal components of the STINGER
22 system, the gripstock and the missile in its disposable
23 launch tube, shall be stored in separate locations. Each
24 location shall meet all physical security requirements
25 applicable to the STINGER system as a whole. The

1 two locations shall be physically separated sufficiently
2 so that a penetration of the security at one site shall
3 not place the second at risk.

4 (12) The principle components of the STINGER
5 system, the gripstock, missile, and launch tube, may be
6 brought together and assembled only under the follow-
7 ing circumstances:

8 (A) In the event of hostilities or imminent
9 hostilities.

10 (B) For firing as part of regularly scheduled
11 training (only those rounds intended to be fired
12 shall be withdrawn from storage and assembled).

13 (C) For lot testing (only proof round(s) shall
14 be withdrawn and assembled).

15 (D) When STINGER systems are deployed
16 as part of the point of defenses of high priority in-
17 stallations or activities.

18 (13) Field exercises or deployments wherein the
19 use of STINGER system is simulated shall not create
20 conditions for the assembly of the system.
