Chief, Engineering Division, OC

SUBJECT:

Base Station Capabilities Briefing - NMS Study

1. On 21 May 1986, [Redacted] will be delivering the second in a series of briefings covering the development of the functional requirements document for the Network Management System. This working level presentation will address the findings concerning surveys of physical circuit and logical network management capabilities of base stations, and matrix switching functional capabilities in commercially available systems. The presentation will be held in the Procurement Division conference room, [Redacted] at 0930. [Redacted]
