MEMORANDUM FOR: Director of Information Technology, DA

FROM:

[Redacted]

Chief, Information Management Staff, DO

STAT

SUBJECT:

Request for a New UPID Identifier for the
Special Center

1. This memorandum requests that a new User Program ID (UPID) be created in the Cable Dissemination System to deliver cables to the Special Computer Center. This UPID will be used with the SAFE Delivery 3.1 system which is scheduled to begin collecting DO cables in January 1988. Installation of a dedicated line from the Message Handling Facility to the Special Center by the fourth quarter of CY87 has been requested to accommodate this traffic.

2. Through preliminary meetings with your staff, it was determined that the UPID identifier should be 'H'. A non-printable Office Unit Symbol of DOMDS should be placed in the dissemination area of the cable for identification. All DO addressed cables that are now sent to the Special Center with an identifier of UPID 'D', except DO Contact Reports, should be addressed with this new UPID identifier and transmitted through the new communications line to the Special Center.

3. If additional information is required or questions arise, please contact [Redacted]
