MEMORANDUM FOR: Contracting Officer

FROM:

SUBJECT: Compliance With Nonforeign ADP Resource Policy

REFERENCE:

1. Referent requirement requests the acquisition of ADP resources in accordance with Procurement Note No. . This Office has determined that:

- The equipment and/or sources available (or recommended) to supply the equipment are domestic.
- That the equipment and/or source of supply constitutes foreign ADP resources as defined in Procurement Note No. *The* Attached memorandum fully sets forth an exemption request
- This Office has been unable to determine the extent to which the equipment or vendor may qualify as a nonforeign ADP resource and accordingly request your assistance and that of the Office of Security in determining the facts.

MEMORANDUM FOR: Director of Logistics

THROUGH: Director of Security  
Agency Contract Review Board  
Contracting Officer

FROM:

SUBJECT: Request for Approval to Acquire Foreign ADP Resources

REFERENCE:

1. Approval is hereby requested to acquire equipment described at Tab A, I.

2. This Office has thoroughly analyzed this requirement and has determined that the identified foreign equipment or vendor is necessary to fulfill a mission requirement of the Central Intelligence Agency, and that there is no nonforeign equipment or vendor which can adequately fulfill the mission requirement. A more detailed analysis of our reasons is set forth at Tab A, II.

3. We have determined that, from our standpoint, the specific security risks inherent in this acquisition are acceptable, in view of the benefits which the Agency will receive by acquiring the equipment or service. Our specific analysis of the security risks and the degree of foreign involvement is set forth at Tab A, III.

4. The Communication Security Division, OC, has advised that the equipment is/is not Tempest approved. Their specific findings are set forth at Tab A, IV.

5. Accordingly, this Office requests approval to acquire the identified foreign ADP resource on the grounds checked below.

- Overriding technical operational or administrative requirements support such a procurement.
- The procurement of the system does not pose an unacceptable risk to security.
- The system is composed primarily of U.S. assembled ADP systems and subsystems, serviced and supported by U.S. nationals and any foreign content is limited to:
  - A critical system or subsystem acquired from a foreign manufacturer as a nondedicated stock item

requiring no direct support or service from the foreign manufacturer and a U.S. owned support organization exists such that interaction with a foreign manufacturer will not be required throughout the life of the system.

- A noncritical system or subsystems of limited complexity.
- The system is being purchased from a foreign manufacturer in a manner such that attribution to the Central Intelligence Agency, as the ultimate user of the system, will be protected throughout the life of the system.
- The foreign ADP resource will be permanently dedicated unclassified or nonsensitive applications.
