 Order from LC or SLA mi\$1.80, ph\$1.80 61-15359

Trans. of Zhurnal Neorganicheskoy Khimii (USSR)
 1957 [v. 2] no. 12, p. 2716-2722.

Experiments showed that BF_3 is more strongly bonded
 to pyridine than to ether; pyridine is more strongly
 bonded to BF_3 than to SbF_5 . $Py \cdot BF_3$ is extremely
 readily soluble in benzene: $[Py \cdot BF_3] = 44.4 + 1.195t$;
 solvated crystals are not formed in the range studied.
 The solubility of $Py \cdot BF_3$ in ether is slight. Decompo-
 sition of $Py \cdot BF_3$ in aqueous alkaline solutions takes
 place as a first order reaction through the stage of
 hydrolysis (or solvolytic dissociation). The connection
 between the velocity constant (in min^{-1}) and the tem-
 perature is described by the equation $\log 0.4343k =$

Trans. of Paperi ja puu (Finland) 1960, v. 42, no. 8,
p. 443-447.

A comparatively accurate measurement of draws between sections can be arranged on continuous drive paper machines, with the help of mechanical or electrical differential and tachogenerators. The differences in rpm which can be compared by means of the differential can be "magnified" so that tachogenerator measuring errors will not appreciably affect the final result. The method has been adapted for use on a paper machine equipped with a mechanical differential drive, by using the differential gears in the gear-boxes of the sections as an aid to measurement.

v. 35, p. 1314-1317. (Abstract available)

DESCRIPTORS: *Metabolism, *Cholesterol, Blood
serum, Fatty acids, Temperature, Freezing.

Change in the amount of serum cholesterol at low
temperature was investigated, with findings as follows -
(1) At -10°C the change was very slight. (2) At -20°C
(Biological Sciences--Biochemistry, TT, v. 11, no. 2)
