DESCRIPTORS: *Absorption, Nitrogen, Phosphorus,
*Pine, Plants (Botany), *Soils, Forestry, Trees.

A study was made of the nitrogen and phosphorus content
in pine seedlings grown under different regimes of
nourishment and water supply during their first year
of life. Some data were obtained also for the plants
in their second year of life, both for sown nursery
plants and for natural seedlings, which were culti-
vated under forest conditions. (Author)
