Bulked yarn was manufactured according to the following
steps. The extruded fibers passed through a stapling
machine where they were stretched in the zone of gentle
heating and stapled in the breaking zone; next they
passed through a "crimping" device and were collected.

THE THAWING OF BLOCKS OF SMALL FISH.
Dec 61 [28]p. 19 refs. RTS 1943.
Order from OTS or SLA \$2.60 62-13735

Trans. of mono: Razmorazhivanie Blokov Maloi Ryby, pub. by Gostorgizdat, 1959.

DESCRIPTORS: *Frozen food, *Fishes, Freezing,
*Processing, Preservation, *Food, Irrigation systems.

It is recommended that blocks of small fish are defrosted by an irrigation method. This reduces the time required for defrosting by a factor of 1.5-4.5 as compared with immersion methods and simplifies the process of separating thawed fish from the block and from each other. Moreover, irrigation methods obviate the possibility of defrosted fish being of variable quality.
