tion, Medical examination.

Examination was made of the focus of inflammation of
127 patients with various forms of acute appendicitis to
investigate the relation between the leukocyte reaction
and the disease. Leukocytosis was evident in most
patients. More specifically, the deeper the inflam-
matory process in the wall of the vermiform appendix,
the more infrequent and less evident was the leukocyte
reaction at the inflammatory focus as compared with

DESCRIPTORS: *Electrolytes, Electrical conductance, Resistance, *Boric acids, *Ammonia, *Glycols, Ethylenes.

The resistivity of the H_3BO_3 - ammonia - ethylene glycol system reaches a maximum value with pure ethanediol. When H_3BO_3 or ammonia is added, the conductance of the solutions rises rapidly. (Extracted) (Chemistry-Physical, TT, v. 6, no. 6)
