DESCRIPTORS: *Charcoal, *Gases, *Adsorption,
Heat of activation.

At temperatures of from -183° to +100° platinum ex-
hibits no catalytic effect on the adsorption of hydrogen
on charcoal. The difference at these temperatures be-
tween the adsorption on platinized and nonplatinized
charcoal is attributed to the adsorption of hydrogen on
the platinum, and is proportional to the platinum con-
tent. At temperatures between 300° and 800° the quan-
tity of hydrogen adsorbed on the charcoal increases with
