DESCRIPTORS: Amines, Phenol radicals, Diagnosis,
*Rheumatic diseases, Inflammation, *Biochemical
tests, Medical examination.

It was found that, by comparison with (Standard Sub-
strate)(SS) glucose is much more sensitive to changes in
the concentration of sulfuric and acetic acids and in the
time and temperature of heating the samples. For
example, an increase of 10% in the concentration of the
sulfuric acid in solution B causes an increase of 20-30%
in the optical density of the glucose, and replacement of

ON THE QUALITY OF TYPE Yu-16 LUXMETERS.
1961 [5]p. 2 refs. AERDL T-1659; AD-290 554.
Order from OTS or SLA \$1.10 63-13404

Trans. of [Russian] article from an unidentified source,
n. d.

DESCRIPTORS: *Photometers, Reliability, Design,
Lighting systems.

The Type Yu-16 Luxmeter consists of a rectangular selenium photo-element, with a working area of 25 cm² and a meter of 1.0 accuracy. The luxmeter has three basic measurement ranges of 25-100-500 lux and three supplementary ranges of 2,500-10,000-50,000 lux, obtained by means of an absorber mounted on the photo-element. The absorber consists of a metal frameholding two plates of frosted damped lucite. Between the two (Engineering--Electrical, TT, v. 10, no. 1) (over)

(CROSS-LINKED) POLYMERS. [1961][28]p. (4 figs.
omitted) 9 refs.
Order from LC or SLA ml\$2.70, ph\$4.80 61-10912

Trans. of Vysokomolekulyarnyye Soyedineniya (USSR)
1959 [v. 1] no. 11, p. 1659-1666.

The free energy of the network of a swelled polymer was
calculated by assuming as chain model the "pearl neck-
lace" earlier employed in studies on the volume effects
in polymer solutions (Zhur. Tekh. Fiz. 28: 1437, 1958).
The application of procedures from the theory of real
gases is valid provided the correlation between the rela-
tive fluctuations of segment pairs decreases sufficiently
rapidly with increasing distance between them. It is
shown on a particular example that such a decrease does
take place. The dimensionless free energy expansion
factor is proportional to the mean number of segments
