Trans. of Terapevticheski Arkhiv (USSR) 1962, v. 34,  
no. 8, p. 53-59.

**DESCRIPTORS:** \*Vital statistics, \*Atherosclerosis,  
Blood circulation, Heart.

Clinical statistics reveal certain patterns in coronary atherosclerosis morbidity and sequelae. Although the figures relate to only one town and one year, they give a fair indication of the importance of coronary pathology in general as a cause of death and disability. The accumulation of such data in the future can constitute an important landmark in the prophylaxis of coronary atherosclerosis. (Author)
