8p. (5 figs. omitted).
Order from LC or SLA m\$1.80, ph\$1.80 61-19477

Trans. of Austrian patent 183,532, cl. 34c, 28, appl.
22 Jan 54, pat. from 15 Mar 55, pub. 25 Oct 55.

The cover frame or fitting is fixed indirectly to a basin
or other fitting by means of supporting elements which
can be fastened to the basin flange or other fitting. The
suitably bent free edges, which extend over the basin
edge into the opening thereof, or portions of said sup-
porting elements abut against the lower side of the re-
versely bent inner edge of cover frame, thereby pre-
venting both lateral displacements of the cover frame
and displacements thereof perpendicularly to the
basin opening.
