Solechnik, N. Ya. and Alkin, V. P.  
PROBLEMS CONCERNING THE DEFORMATION OF  
PULP FIBRES AND PULP BEATING. [1960] 5p.

11 refs.  
Order from OTS or SLA \$1.10 61-10680

Trans: of Bumazh'naya] Prom[yshlennost'] (USSR)  
1959, v. 34, no. 12, p. 7-8.

DESCRIPTORS: \*Wood pulp fibers, \*Wood pulp, Me-  
chanical properties, Processing.

Experiments showed that pulp undergoes the three  
kinds of deformations which occur in high molecular  
weight polymers: elastic, highly-elastic and plastic.  
This indicates that the deformation of pulp during beat-  
ing has a relaxation character. Therefore the correct  
choice of the magnitude of the pressure and its fre-  
quency of application is very important. The speed and  
nature of beating depends largely on the ratio of the  
various kinds of deformation inherent to the fibre.
