Trans. of ETZ [Elektrotechnische Zeitschrift]
Ausgabe B. [für Elektrotechniker] (Germany) 1962.
v. 14, no. 3, p. 49-55.

DESCRIPTORS: *Carbon brushes. *Commutators.
Electric machinery. Power equipment. Materials.

The author suggests a definition of commutating ability of carbon brushes and gives a measurement procedure for it. Ultimately the commutation difficulties of electrical machines are due to the self induction of the rotor windings. In switching a rotor segment the brush is not loaded with the energy stored in this inductance, but with a voltage impulse. For this reason the measuring procedure chosen here avoids the possibility of every
