Trans. of Energomashinostroenie (USSR) 1960, v. 6, no. 7, p. 1-5.

DESCRIPTORS: *Disks, Vibration, Frequency, Mathematical analysis.

A method is presented for computing the frequencies of characteristic vibrations of bladed disks with naturally twisted blades. The consideration of the twisting of the blades noticeably reduces the frequency of vibrations of disks, and gives values for the frequencies close to the experimental values.
