DESCRIPTORS: Insectidea, *Adhesives, *Surface
properties, Measurement *Friction, Temperature,
Differential equations, Particles

Tests showed that particle size is decisive for the
magnitude of the adhesion. With very fine grains,
practically no sliding is obtained because only a lim-
ited sliding surface is available. The properties of the
material have less influence on adhesion than the parti-
cle size, but more than the other influential quantities.
The dependence of adhesion on the granularity in-
