(Abstract available)

DESCRIPTORS: *Potatoes, *Seeds, Cooling, Storage,
Growth (Physiology), Preservation, Refrigeration
systems.

Methods using chemicals or irradiation gives satisfac-
tory results for the storage of table potatoes. But the
storage of seed potatoes raises an additional problem:
that of their reproductive power. The dormancy of
seedlings, i. e. no sprouting may be lengthily extended
at temperatures near or slightly lower than 35°F.
