TT-63-18862

I. Pircher, G.

Trans. of Infrared Physics (England) 19(2), v. 2, p. 141-153. (Abstract available)

DESCRIPTORS: *Detectors, Radio receivers, Optical equipment, Sensitivity, Correlation techniques.

Active radio and optical detections have several features in common, especially when optical detection employs coherent waves. A comparison of factors entering into the detection equations is made. The essential differences between superheterodyne or direct amplification radio receivers and direct detection optical receivers are at issue. An expression of ultimate sensitivity.
